

Public Schools Open Sept. 11; Record Enrollment Expected

The ten public schools of Washington Township will open their 1951-52 school terms on Tuesday, September 11 with what principals anticipate will be a record enrollment.

This fall will mark the last time new students will be able to enter kindergarten at four and one-half years of age or first grade at five and one-half years. New legislation has raised the minimum age requirement in each division by three months after this term.

The public school teachers of the county will meet for their annual pre-school institute next Wednesday and Thursday.

On Wednesday the high school and elementary school teachers will meet together at Hayward High School. At 10:45 a.m. they will hear an address by William S. Knowland, U. S. Senator, on the topic, "American Foreign Policy."

Wednesday afternoon they will be addressed by James Quillian, professor of education at Stanford University on the topic, "Education and the World Crisis," and an address by Dr. Robert N. Bush, associate professor of education at Stanford, "Teacher Evaluation."

Thursday the elementary school teachers will meet at the Irvington School for an all-day session.

J. I. MacGregor, principal of the Newark School and chairman of the institute committee, will preside.

The morning session will be taken up with discussions of the services of the California Teachers Association and the teachers' retirement plan.

The group will be divided into four sections Thursday afternoon. Section one will meet at the Centerville School for a discussion of mechanics of classroom management, led by Irma T. Bond, Irvington teacher, and Luncy Ryan of the county office.

Section two will meet at the Niles School to discuss planning and evaluating the teachers' program. The discussion will be led by Isabell Mosely, Warm Springs principal, and Audrey Mitchell of the county office.

Section three will meet at the Decoto School to study developing a social studies unit, led by Mary Virginia Bristow, Niles teacher.

The fourth section will meet at the Newark School where Mary Shea, Newark teacher, will discuss a primary child's duty.

OPENING LUNCHEON FOR COUNTRY CLUB

The fall season of the Country Club of Washington Township will be launched with a luncheon to be held at the International Kitchen on September 11, according to an announcement this week from Mrs. A. E. Alameda, president.

The program has not been definitely outlined yet, but the presence of a luncheon speaker is almost assured, which will be augmented by a short musical program.

Mrs. Leroy Brown and Mrs. Ted Logan are co-chairmen and reservations can be made with them.

GUNFIRE CLIMAXES NEIGHBORHOOD FEUD IN NEWARK

A neighborhood feud at Newark was climaxed by gunfire last Saturday afternoon with one man critically injured and the other taken into the custody of the sheriff's office pending the filing of charges.

The victim was LeRoy Burstron, 35, and his assailant was 52-year-old James Ossana, both of whom reside on Thornton Avenue at the west side of town.

Lloyd Auchard, who resides near the Ossana home, called sheriff's deputies after he heard a shot and saw Burstron fall to the ground near Ossana's back porch.

SHOT IN LUNG
An ambulance was called and rushed the victim to a local doctor and then transferred him to Highland Hospital where he underwent surgery for the removal of the bullet from his right lung.

Captain Richard E. Condon, Sergeant Bill Hildebrand, and deputies Ken Lundberg and William Miller of the sheriff's department, surrounded the Ossana house and ordered him to come out with his hands up.

Ossana opened the rear door and surrendered to Deputy Miller. He told officers that Burstron had come to his home earlier that afternoon and the two men had gotten into a quarrel. Pointing to an abrasion on his forehead, Ossana told the officers that Burstron had hit him and knocked him down. He showed them scuff marks in the yard where the alleged altercation took place.

NO CHARGE YET
He related that he had gotten away and gone into his home. A short time later Burstron started back towards the rear door of the house and when he got within about 10 feet of the door Ossana opened the door and fired with his .22 rifle.

"I closed the door, put the rifle away and just waited," Ossana concluded.
He is expected to be charged with assault with a deadly weapon, however, no formal charge had been filed late Wednesday.

DARING BURGLARY AT CARDOZA HOME

A daring burglary at the Louis Cardoza home on Norris Road in Centerville on Tuesday evening resulted in the loss of a purse and its contents, including approximately \$40, for Mrs. Loretta Ferguson of Centerville, Mrs. Cardoza's mother.

Mrs. Ferguson and Mrs. A. E. Alameda of Irvington were dinner guests at the Cardoza home while Mr. Cardoza was attending the Lions Club meeting. During the early evening they went to the basement rumpus room to watch television. When they returned upstairs the outside door from the patio into the dining room was ajar and Mrs. Ferguson's purse was missing from the table.

GREGORY BROTHERS SERIOUSLY INJURED

Two Niles men, Kenneth Gregory, 34, and his brother, Richard, 31, were seriously injured late Sunday night in a head-on highway crash near Crockett.

Kenneth, owner of Kenny's Cafe in Niles, is in the Veteran Administration Hospital in Oakland suffering from fractures of the left elbow and right knee and facial lacerations.

Richard, an employee of the Pacific States Steel mill, is at Permanente Hospital, suffering from a skull fracture, broken collar bone and lacerations.

WHERE 50 PERSONS DIED . . . A portion of the smoldering wreckage of the giant DC-6B United Airliner which crashed on a hillside near Decoto last Friday. Section of the huge tail of the plane is scanned by a deputy sheriff attempting to locate positive identification numbers, while a fire crew in the left background fights the grass fire started from the explosion when the plane struck.—Ken Foster Photo

GROUND BROKEN FOR NEW POST OFFICE AT NILES

Construction began this week on the new Niles post office at the corner of Second and J Streets.

The contract to build the new structure was awarded last Friday by Mrs. J. A. Silva to Dan Bodily, Niles contractor. Mrs. Silva did not disclose the exact cost of the new building but said that it would be slightly under \$18,000. Bodily's bid was the lowest of the four submitted, Mrs. Silva said.

The new building will face on J Street and will be stucco exterior with a brick veneer front. It will be considerably larger than the present building housing the post office.

Mrs. Silva said this week that her ten-year lease with the post office department calls for the building to be completed and ready for occupancy by December 1.

She stated that her building, which houses the post office at the present time, will be converted into either a store building or an office building.

With the construction of the new building here Niles will become the fourth Washington Township community to get a new post office building in the post-war era. Other new buildings have been constructed at Irvington, Centerville and Newark.

Bids for a new building, or expansion of the present post office, have been called for the Decoto post office.

POST OFFICE PLANS . . . Contractor Dan Bodily, left, and Postmaster Edward E. Enos look over plans of the new Niles post office building which Bodily will construct at the corner of Second and "J" Streets for Mrs. J. A. Silva.—Register Photo

TOWNSHIP HISTORY IN COMIC STRIP

Local historians—as well as comic-strip fans—are following the adventures of Casey Ruggles in the comics of The San Francisco Chronicle each day with mounting interest. The reason is—as pointed out to the editor of The Register by a local historian—that the scene of Casey Ruggles' adventures is laid in Washington Township.

Yesterday, for example, the comic strip told of the bandit Juan Soto, who, in the act of being captured at Scott's Corner, cut off toward Vallejo Mill. As every history-minded localite knows, "Scott's Corner" and "Vallejo Mill" are very familiar names in this area.

STATE AWARDS TO LOCAL VINTNERS

Two Washington Township wine producers who entered their products in the competition at the California State Fair won many high honors.

The Weibel's Champagne Vineyards at Mission San Jose won a gold medal for its Sweet Vermouth, a silver medal (highest award in that division) for dry vermouth and champagne rouge, bronze medal (highest award) for its black muscatel, and honorable mention for its aperitif (herb flavored) dessert wine, grey Reisling, Johannisberger, burgundy and pinot chardonnay.

Mrs. Ann Mayock's Los Amigos Vineyard at Mission San Jose won a gold medal for its dry sherry.

BELVOIR HOTEL, NILES LANDMARK, SOLD YESTERDAY

The sale of an undivided half interest in the old Hotel Belvoir at Niles, Southern Alameda County landmark, was announced yesterday.

The half interest in the 67-acre ranch and the 22-room hotel and four adjoining bungalows was purchased from Mrs. Marie Bishop of Niles by Joseph Grimshaw of Hayward.

Grimshaw, owner and operator of the Grimshaw Citrus Nursery near Hayward, plans to move his entire nursery to the new location here.

The other undivided half interest in the land is held by Mrs. Bishop's sister, Mrs. Helen Hobson of Beverly Hills.

The hotel was opened here before the turn of the century by Mr. and Mrs. Giles Chittenden, grandparents of Mrs. Bishop and Mrs. Hobson.

In the early days it was the favorite resort for city residents coming to Niles Canyon to spend their vacations. It also served as living quarters for many of the old-time movie stars who worked at the Essanay Studios here.

The transaction was completed by Louis L. and Joseph Cardoza, Centerville realtors.

HOUSTON RETURNS TO ARMY DUTY

Captain Harry Houston of Newark received his orders last Thursday to report for active duty with the 114th Engineers Combat Battalion at Camp McCoy, Wisconsin.

Captain Houston served with the U. S. Army Engineers Corps during World War II and has been active in the reserves since his release to inactive duty in February of 1946. He recently applied for return to active duty.

He will leave on September 4 and will stop enroute to visit relatives at Dallas, Texas and St. Louis, Missouri.

He stated this week that for the present time he will retain his interest in the business of Sears and Houston.

NEW ACTING FARM ADVISOR IS NAMED

The appointment of an acting director of agricultural extension to serve this area during the absence of Lee Benson was announced this week by the extension service.

Walter Johnson, who has been operating out of this area office, will be in charge of administration during the next year.

Benson left Monday for a ten month advanced study course at Cornell University. He was one of four farm advisors throughout the nation offered scholarships to attend the school.

NILES WOMAN SUFFERS ATTACK OF POLIO

Mrs. Maria Merrill of 300 Jones Way, Niles, is in the isolation ward at Highland Hospital suffering from polio.

Mrs. Merrill, mother of three small children, was taken to Alameda Hospital on Sunday. Wednesday her illness was diagnosed as polio and she was transferred to Highland Hospital.

Plane Crash at Decoto Termed State's Worst

A giant United Airlines' DC-6B passenger plane roared down out of the overcast skies and struck a hilltop near Decoto early last Friday morning, claiming the lives of all of the 50 persons aboard.

The pilot, Captain M. W. Hedden of Los Altos, radioed the Oakland Airport (his destination) at 5:27 a.m. that he was over the Newark marker on the radio beam and would be on the field in another six minutes.

Instead the new million-dollar aircraft plowed into the peak of one of the hills behind the Masonic Home six minutes later and definitely off course to become the worst air crash in California history.

The 44 passengers and crew of six were instantly killed as the mighty airliner struck within 15 feet of the top of the hill, somersaulted over the peak, scattering torn bodies and chunks of metal, and tumbled down a deep ravine known as Dry Gulch Canyon.

Many local residents saw the flash and heard the explosion as the plane struck. The report was telephoned to the sheriff's substation in Hayward and deputies and members of the Decoto Fire Department made their way up the hillside to extinguish the grass fire started by the explosions.

It was immediately obvious to them upon reaching the scene that there were no survivors.

A roadblock was set up by the State Highway Patrol and sheriff's department on the narrow winding road that led from the San Jose-Oakland highway to the scene of the crash, as hundreds of motorists jammed the highway endeavoring to see the wreckage.

Atop the hill there was the hush of death as officers moved among the scattered debris gathering up the broken bodies and safeguarding the wreckage for official investigation by the Civil Aeronautics Board and the Federal Bureau of Investigation.

A temporary morgue was set up in the auditorium of the Decoto Elementary School where the bodies were taken for identification by the next of kin.

The majority of the bodies were at the bottom of the deep ravine and it was necessary to bring them out by horseback. The task of removing the bodies of the victims was not completed until late the following day.

Oddly enough an estimated 90 per cent of the airmail and express carried by the airliner was recovered, according to E. E. Enos, Niles postmaster, who aided in salvaging the scattered mail. The initial impact of the crash apparently split open the compartment in which the mail was stored and it was thrown clear. Largest extent of the damage to the mail resulted from the grass fire started by the smoldering wreckage.

The F.B.I. and Civil Aeronautics Board have assigned many of their top men to investigate the circumstances of the crash and have asked that any persons witnessing the crash notify a local officer so that the information may be recorded.

Investigators are still camped atop the peak combing the area for missing parts of the plane and salvaging everything possible for study.

LIONS TO SPONSOR SCRAP METAL DRIVE

A scrap metal drive, such as was conducted so successfully here during World War II, is again to be launched by the Centerville Lions Club.

The Lions voted unanimously at their meeting Tuesday evening to conduct the campaign and accepted the offer of Frank Bothello of Centerville for the use of his lot adjacent to the Cloverdale Creamery as a collection point.

Heavy scrap steel and iron is all that will be accepted. No tin cans can be accepted, it was stated. Persons able to transport their own metal scrap may leave it at the lot. Those needing transportation for the scrap may telephone Centerville 8-8310.

President LeRoy Brown named Ed Vieira, L. S. Williams, Edw. L. Rose and Joe Castro to the transportation committee.

SUPERVISORS CUT 1951-52 COUNTY TAX RATE 16 CENTS

A final budget of \$47,486,318 for 1951-52 for the operation of Alameda County government has been adopted by the Board of Supervisors, pointing to a basic tax rate of \$1.88—a 16-cent reduction over the past fiscal year.

The Supervisors were expected to formally fix the tax rate at a deadline session yesterday.

The expected \$1.88 rate is two cents less than the 14-cent cut anticipated after the adoption of the preliminary budget.

In whittling down the rate from the \$2.04 tax of last year, the Supervisors cut the rate back to the same as two years ago.

Courthouse officials ascribed the reduction chiefly to the increase in the assessment on the public utility roll, an increase in real property assessments and the lessening of the relief fund because of increased employment.

Adoption of the budget came after a prolonged hearing granted the Alameda County Taxpayers Association in the office of Board Chairman Harry Bartell.

Here is a breakdown of funds in the budget: salary, \$5,738,367; general, \$7,474,695; care of indigent sick and poor, \$9,563,308; welfare and security, \$17,592,284; advertising, \$225,000; forestry fire, \$60,390; exposition, \$102,100; veterans buildings, \$572,096; good roads, \$4,583,772; handicapped children, \$92,893; county relief bond redemption, \$182,845; courthouse, hall of records bonds redemption, \$116,655; general reserve, \$1,181,913; total, \$47,486,318.

COMMUNITY CHEST TO SET BUDGET

All organizations expecting to benefit from the coming Washington Township Community Chest Campaign should have representatives at next Thursday evening's meeting to submit their budgets, it was announced this week by President Bruce Michael.

The meeting will be held at the new county building at 8 p.m. and the budget for the October campaign is expected to be established at that time.

Organizations benefiting from last year's campaign funds were Girl Scouts, Boy Scouts, Travelers Aid, Salvation Army, Associated Services, Newark, Irvington and Alvarado Youth Centers.

McDOWELL-METTE RITES HELD SATURDAY AT ST. JAMES CHURCH IN CENTERVILLE

Edith Hall McDowell of Phoenix, Arizona, and William D. Mette Jr. became man and wife last Saturday at a 4 o'clock ceremony held at St. James Church.

Edith is the daughter of Mrs. Edward P. McDowell of Phoenix, assistant to the dean at Mills College. She is a San Jose State graduate and is a teacher at Campbell.

Bill, the son of Mr. and Mrs. William D. Mette of Oak Street, is a senior at San Jose State.

The bride, given in marriage by her brother-in-law, Carl Miller, wore a gown of chantilly lace over satin and a finger-tip veil of illu-

sion. She carried white orchids and stephanotis.

Mrs. Frank L. Rosman of Carmel, sister of the bride, was in the role of matron of honor and wore a gown of pink taffeta.

Bridesmaids were Mrs. Carl Miller of Oak Street, sister of the bride, and Mrs. Harlan Heath of San Jose. Mrs. Miller wore a gown of pastel green taffeta and Mrs. Heath was in orchid. All three wore halos of taffeta and tulle to match their gowns and carried bouquets of orchid stocks.

John Rise of Newark was best man, while Robert Scott of Newark and Roger Waite of San Jose were ushers.

The groom's mother, Mrs. William Mette, wore a lovely gown of brown lace over satin with a feather hat and gold accessories.

Mrs. McDowell, mother of the bride, wore an aqua blue crepe, a flowered hat to match, and navy blue accessories.

A reception followed immediately after the ceremony at the Country Club.

After their honeymoon the couple will take up residence in Campbell.

—Irene Mendonca

Bridge Club Meets

Mrs. Allan Hirsch of Irvington was hostess to the members of her bridge club last Tuesday evening. Those present were: Mmes. Val Bailey, Harriet Thornburg, Lois Gravestock, Frances MacGregor, Helen Moore, Doris Gould and Nyla Connolly. The two latter were substitutes.

V.F.W. TO SPONSOR VETS YULE DRIVE

The disabled veterans at Oak Knoll Hospital will be well supplied with Christmas gifts this year if the efforts of the Vallejo Mills Post, V.F.W., are carried out successfully.

At its last meeting, the Post voted to sponsor a Christmas gift drive sometime in November or early December. The idea was suggested by Pat Patchett of Niles who, last year, was a one-man Santa Claus who delivered gifts contributed by sympathetic citizens of the township. The response of the hospitalized veterans was so heart-warming that Patchett, who was surprised and touched by the gratefulness of the boys, thought the Christmas gift drive should be carried out on a larger scale. Thus the decision was made to make it a V.F.W. project.

Stores in the towns of Decoto, Centerville, and Niles will be designated as "receiving stations," where local citizens may bring and leave wrapped Christmas gifts such as candy, cigarettes and other items that will prove welcome to a hospitalized man.

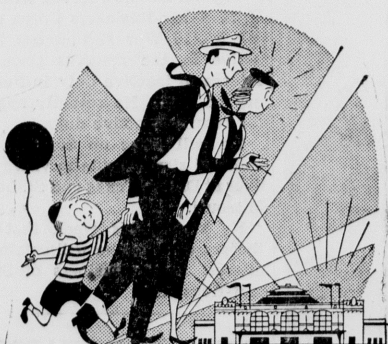

Patchett has been named chairman of the Christmas gift drive, and will be assisted by William Marlen and Joe Janeiro.

Further information concerning the drive will be announced in the Register at a later date.

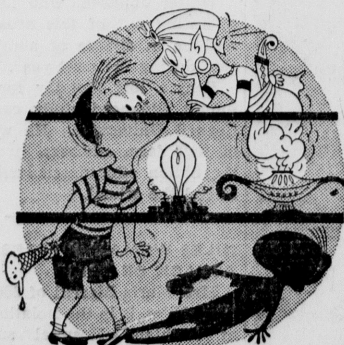

Colusa sandstone, from Colusa County, is found in many well known buildings in San Francisco and other northern California cities.

PACIFIC GAS AND ELECTRIC COMPANY

SHIRLEY ALAMEDA, GENE LORENZ REPEAT VOWS AT COLORFUL GARDEN CEREMONY

In an archway of magnolia leaves and blossoms, Shirley Alameda last Sunday repeated the vows that made her Mrs. Gene Lorenz. The setting was the beautiful gardens at the home of her parents, Mr. and Mrs. A. E. Alameda of Irvington where over 200 guests witnessed the ceremony which was performed by the Rev. Howard Steward.

It was an all white wedding, with the attendants—Mrs. Boyd Crowe (Doris Alameda), the matron of honor, and the bridesmaids, Mrs. Charles L. Elsasser, Mrs. Stanley Maffey and Mrs. Irving Alameda—in white nylon net ballerina frocks fashioned with an off-the-shoulder ruff. With the exception of the honor attendant, who wore white marguerites in her hair, they all wore yellow marguerites as bandeaus in their hair, and carried baskets of the same flowers. Mrs. Crowe's basket was aqua. The little flower girl, Sandra Brask, was also in white, carrying yellow marguerites.

The bride, going down the walkway on the arm of her father, was in an ankle-length gown of nylon net over taffeta, styled with a basque top, and a bouffant tier skirt. Her nylon illusion veil was caught with a bandeau of orange

blossoms. She carried an unusual bouquet of white gladioli fashioned to simulate gardenias.

Wedding music was supplied by Dwight Thornburg at the organ and Mrs. Melford Alameda (Lorraine McClain) singing "Always" and "Ave Maria."

The flower arrangements, in the house and on the bridal table, were done by Mrs. Allan Walton, assisted by Helen and Bill Rose. Bouquets of white stock, white gladioli, gardenias and bouvardia graced the table, and in the house were bouquets of anthurium.

The bridegroom's brother-in-law, Charles L. Elsasser, was the best man, and ushers were Stanley Alameda, Irving Alameda and Boyd Crowe.

After a honeymoon in Carmel, the newlyweds will return to make their home in Oakland. The bride is a secretary with the Henry J. Kaiser Company, and Mr. Lorenz, son of Mr. and Mrs. Walter Lorenz of Oakland, will continue with his studies at Armstrong College.

Two telegrams received by the bride on her wedding day helped to make it a memorable one for her; one telegram was from her brother, Harold, with the army in Germany, and the other from her brother, Melford, with the army in Japan.

NEW GROCERY WILL OPEN IN NILES

The grocery at the corner of the Niles Mission San Jose highway and Centerville road is to be reopened this week-end under the name of Fairway Grocery.

Mr. and Mrs. Philip Cancilla have leased the store building and adjoining apartment from Frank Rose.

The couple formerly operated the Fairway Grocery at 1000 North First Street in San Jose. They have announced that the store will be open week days from 7 a.m. to 8 p.m. and on Sundays from 8 a.m. to 6 p.m.

Mr. and Mrs. Cancilla have two daughters, Virginia, 11, and Caroline, 4.

Still Very Ill

Friends of Mr. Joe Correia of Irvington are sorry to hear that he is still a very ill man, having been stricken three weeks ago with a heart condition. He is at home, being taken care of by his wife.

Home on Labor Day

Mrs. John Ruskofsky and her two daughters, Joan and Judy, who have been in Westport for the past two weeks visiting relatives, are expected to return home to Newark on Labor Day.

Labor Day—What It Means Here

To a majority of people, Labor Day is just a day that provides an opportunity for family picnics, week-end jaunts, trips to visit relatives, and a chance to close up shop and "get away from it all."

To the laboring man, however, it should have more significance. And to the laboring man of Washington Township, especially, it has great significance, for the laboring man here is just now emerging as a very important figure in the growth of the township.

Washington Township, long identified chiefly with agricultural interests, is coming into its own industrially. In another five or ten years at the most it will be well within the circle defined as the industrial center of Northern California.

For that reason it is gratifying to observe that labor relations in the township have, on the whole, been good, for an area that becomes known as a labor trouble center has three strikes against it. A whole community suffers and is vitally affected by labor difficulties.

To be sure, we have had strikes in the township during the past year. One, in particular, was of fairly long duration. But strikes have been motivated mainly by technicalities. Wages here have been generally satisfactory, and employer-employee relationships in

most township industries have been better than average.

The township is fast becoming a laboring man's community. Its homes are within the price range that his wages can support, industries that employ him are within easy commuting distance, and the prices of life's necessities—food, clothing—are as low, if not lower, in this area as in the cities.

Let us then, as Labor Day rolls around again, take cognizance of Labor, of its importance in our community life, of its value to industrial growth here, and, most of all, of its staunch cohorts, the backbone of our nation's efforts to maintain its prestige in the eyes of the industrial world.

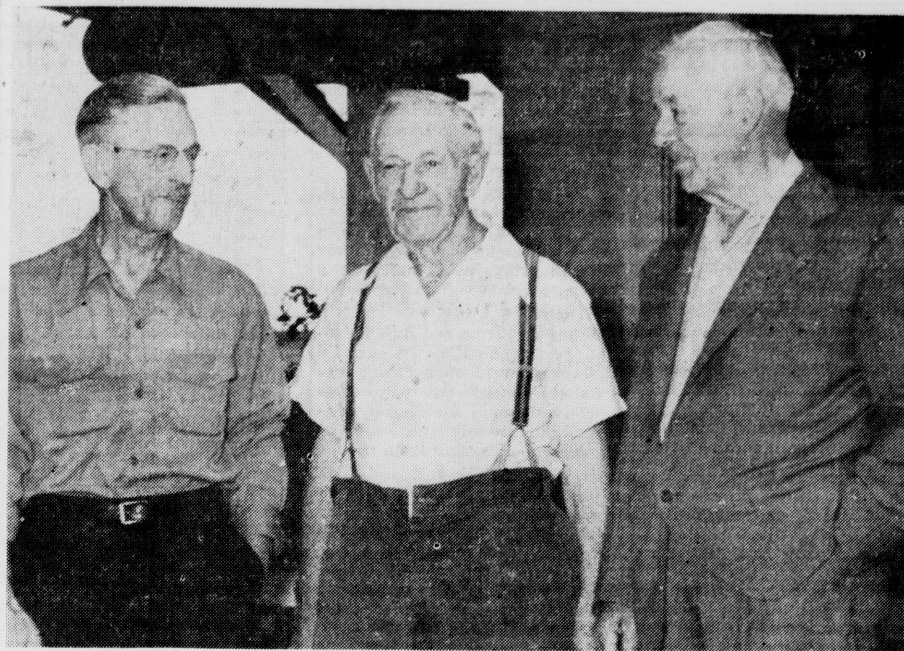

Township Farmers, Here's Your Chance

Every Washington Township farmer should put a circle around September 5 on his calendar. It is an important date.

It is on that day that the farmers will have a chance to not only hear an open discussion of the government's agricultural program but they themselves will be able to participate in the discussion and to express their views and opinions on farm policies.

This meeting, to be held at Hayward High School at 8 o'clock, is only one of similar meetings that will be held all over the country. The U. S. Department of Agriculture is apparently sincere in its desires to enlist the cooperation of the farmers in forming government farm policy and to evaluate the opinions that are expressed at these open meetings.

In any event, the farmer has nothing to lose by attending this meeting and—granting that the Department of Agriculture is really sincere in its expressed determination to obtain the farmers' views—considerable good might come of it, as the farmer will be given the opportunity of discussing each of the agencies located in the county. This is an opportunity that the farmers of Washington Township can not afford to ignore.

THREE BROTHERS . . . The middle one, Calvin Thompson, hadn't seen the one on his right, Worth, for 52 years. The other brother, Alva, has kept in touch with both of them. The reunion was held in Irvington. —Register Photo

BROTHERS MEET AFTER FIFTY-TWO YEARS

BRIEF ENCOUNTER BRINGS BACK MEMORIES

"Well, brother, you've changed a mite since I saw you last."

"Say, now, you look a little different yourself," was the reply.

This little dialogue was carried out between two brothers—one who lives in the township—who had not seen each other for 52 years.

The two were Worth W. Thompson, a painter from Des Moines, Iowa, and Calvin Thompson, a retired orchardist of Washington Township who is at present living in Irvington.

It was 52 years ago, when Worth was 14 and Calvin was 30, that the brothers (they are two of nine boys in the family) had said goodbye when Calvin left Iowa to come to California. During all of those years Worth had stayed in Iowa, and Calvin, though traveling extensively, had never returned to the middle west. In 1909 he came to Newark, later moving to Fremont Avenue and for years was a fruit grower, much of his fruit production being done on the Shinn ranch. He retired in 1926 and moved to Washington—after traveling for five years—where he bought a silver fox farm. The father of Mrs. Byrde Duffey of Niles, he returned to the township

last year to be near his daughter.

Joining the partial family reunion in Irvington last week was another brother, Alva, 72, a fruit grower in Oregon. His was not the "long-lost" brother role, however, for he had kept in touch with both Calvin and Worth through the years. He was present only to participate in the joy of the reunion of the other two brothers.

When asked how California compared with Iowa in his estimation, Worth was quick to reply, "I like Iowa better," which is a natural reaction for anyone who has lived in a state as long as he has lived in Iowa. Calvin, on the other hand, is very happy to be living in California.

Worth, who was lost and lonely without his wife, felt compelled to hurry back to Iowa after only a few days visit here. But the visit could be called a successful one. The "boys" met, reminisced about their boyhood, and bade each other farewell. The brief encounter, after more than half a century, was over, and each settled back to the routine of ordinary life, satisfied now that—come what might—the long-standing desire to meet again had been fulfilled.

CHAMBER OPPOSES TRAILER COURT

The Niles Chamber of Commerce voted Tuesday to ask the Alameda County Planning Commission to refuse a permit for a trailer court on Third Street.

Application for a permit had been filed by W. H. Easley, local jeweler, who stated that he intended to park only his own trailer on the lot directly behind Corpus Christi Church.

It was stated at Tuesday's meeting, however, that to allow one trailer requires the same permit as though the location was being opened up for a trailer court. The members expressed fear that such a permit might lead to an additional location of trailers.

It was announced that the annual barbecue sponsored by the Chamber for the members of the volunteer fire department would be held on September 13 at Solon Bros. A. M. Alves, president of the Fire Commission, will serve as chef.

Judge E. A. Quaresma, president, named Vernon Ellsworth, realtor, as the local delegate to the Township-wide zoning meeting to be held October 3 in the branch county building on Fremont avenue.

CHAIRMEN NAMED FOR ST. JUDE'S

At a recent meeting of St. Jude's Y.L.I. of Irvington, Genevieve Freitas, president, appointed the following chairmen of standing committees: Novena, Gertrude Dutra; membership, Antoinette Pimentel; application, Antoinette Pimentel; publicity, Margaret Williams; scrap book, Anne Rose; ways and means, June Lewis; by-laws, Pearl Guardanapo; big sister, Isabel Vargas; welfare, Nyla Connolly; gifts, Bertha Rose; funeral, Gertrude Dutra; mother pal, Isabel Vargas; study circle, Nyla Connolly; bulletin, Anne Perry; flag team, Melmeda Sylvia.

Ellen Freitas has been elected financial secretary to succeed Mary Freitas, who resigned because of her health.

Mary Angeli of Hanna Institute, past grand president of Y.L.I., has been appointed institute deputy.

SANFORD CIRCLE MEETS

The regular meeting of the Sanford Circle of the Niles Congregational Church will be held on September 14 at 1:30 o'clock.

Twelve tunnels and eight major bridges were constructed during the relocation of the railroad around Shasta Dam and Lake.

SOLDIERS' DEPARTURE DELAYED BY ACCIDENT

Two Eastbay soldiers who were to depart for overseas duty on Tuesday had their departure delayed because of an accident near

Niles early Monday morning.

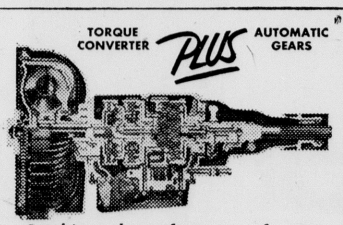

Philip Musco of Piedmont and Edwin A. Watts of Hayward both suffered broken legs when the machine in which they were riding went out of control near the Kim-

ber Poultry Farm and struck a power pole guy-wire, overturned and crashed into the side of a railroad underpass. The machine was completely demolished.

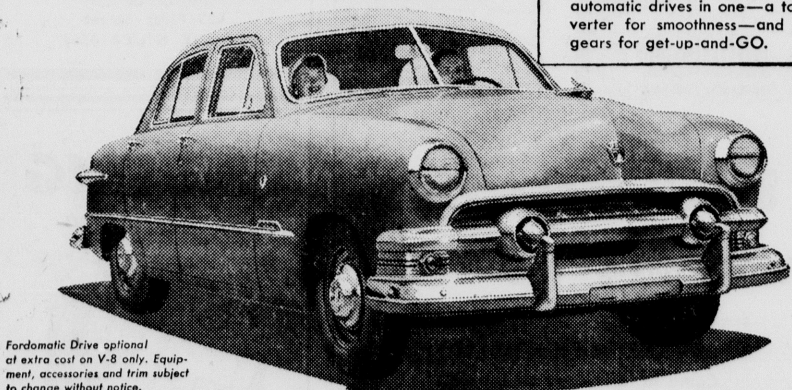

FORDOMATIC

THE FORDOMATIC FORD
GIVES YOU AN ENTIRELY NEW
KIND OF DRIVING!

OUTGOES THEM ALL!

Combines best features of previous drives! Fordomatic gives you two automatic drives in one—a torque converter for smoothness—and automatic gears for get-up-and-go.

Fordomatic Drive optional at extra cost on V-8 only. Equipment, accessories and trim subject to change without notice.

Practically drives itself! Fordomatic thinks for you. It smoothly and automatically provides a countless number of drive ratios through which engine power is fed to the rear wheels.

You're boss every second. Step down on the accelerator and you get an extra spurt of power for hill climbing and passing. Going downhill you can shift to low at any speed for extra engine braking.

Easier rocking! It's even easier to "rock" out of sand, snow or mud with Fordomatic than with Conventional drive. Just move the selector back and forth between low and reverse.

It's a gas-saving powerhouse! Fordomatic's automatic intermediate gear provides smooth, fast, economical "getaway" without wasteful engine racing. Uses no more gas than the savingful conventional Ford.

Come in and "Test Drive" the

WEEK-END VISITORS

Week-end visitors at the home of Mr. and Mrs. Hardy Burt and daughter, Katharine, of Citrus Heights were Mr. and Mrs. Joe Garcia and daughter, Lorene. They returned on Monday.

LUCKY HUNTERS

Two lucky hunters this past week were Joe Semas who got a very nice two pointer on the McClure ranch and Louie Souza who never fails to bring in at least one a season.

BEGINNERS LUCK

Frank and Irma and Butch Vargas, accompanied by Jo and Ed Chambers, went on a fishing excursion Monday but only came home with small ones, but a wonderful day anyway, and what you know, non-fisherman Irma got the first fish.

VISITORS FROM UTAH

Mr. and Mrs. Marvin Lofton and family are very happy this week for her nephew, Mr. and Mrs. Tom Woodbury of Ogden, Utah, and their three children, Susan, Tommy and Ted Jr., are visiting with them.

HOME FROM OREGON

Mrs. Hilda Boitano and daughter, Maralyn, have returned from Portland, Oregon, where they spent their vacation at the homes of relatives.

TO KNIGHTS FERRY

Mr. and Mrs. Eugene Romero and boys, Carlos and Gene Jr., have motored to Knights Ferry. They have lived in the Mission for many months as Mr. Romero was a construction engineer on the big pipe line.

VACATIONING

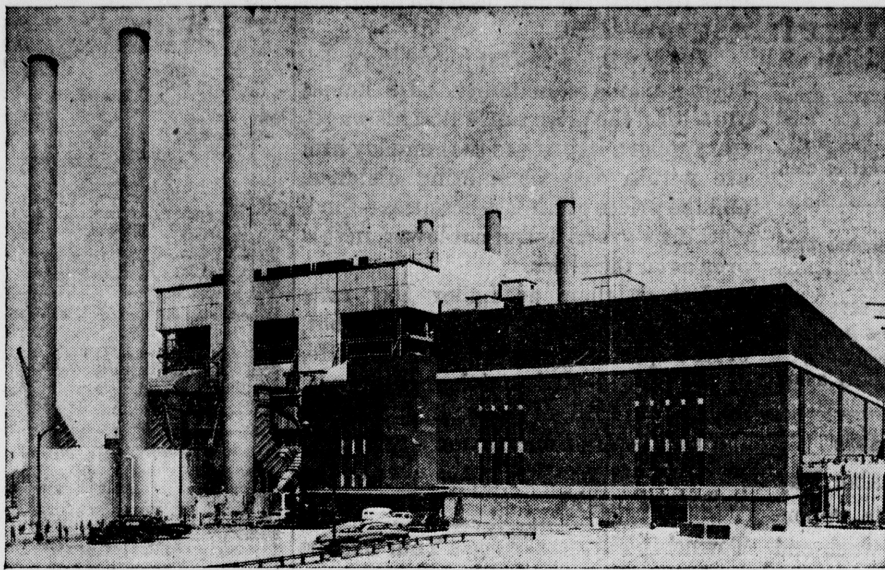

Ronnie Chambers is vacationing in Loomis at the home of his grandparents, Mr. and Mrs. Tom Chambers, and at the home of his sister, Mr. and Mrs. Joe Lopes. His dad and Jo will go and bring him home in a few days to get ready for the opening of school.

TAKE TO THE AIR

Misses Marianna and Allison Moore, daughters of Mr. and Mrs. Arthur Moore of Piedmont and Mission San Jose, are having the time of their young lives in Los Angeles at the Hallbart home as their guests, but the most thrilling thing that has happened to them is that airplane trip south and they are just counting the days till the return via air.

SLICK CHICKS

Last spring 10 boys and girls of the 4-H Club in this vicinity were given 50 chicks each by the Kim-

CONTRA COSTA STEAM PLANT, new \$80,000,000 power generating station on the San Joaquin River near Antioch, which formally joined Pacific Gas and Electric Company's interconnected system this week at dedication ceremonies. The plant's present capacity is 300,000 kilowatts. Construction is under way on an addition to boost the plant's capacity to 600,000 kilowatts by early 1953. At that time Contra Costa's capacity will be more than enough to serve the total power needs of a city the size of San Francisco. Acting Governor Goodwin J. Knight, P. G. & E. President James B. Black and General Contractor Stephen D. Bechtel participated in the dedication which was witnessed by 400 civic and industrial leaders from nine counties.

OPEN FARM MEET TO BE IN HAYWARD

Washington Township farmers, along with other farmers of Alameda County, will have their chance to review the programs of the U. S. Department of Agriculture on Wednesday evening, September 5, at an open discussion meeting to be held in the cafeteria of Hayward High School at 8 p.m.

With the current emergency bringing forth cries of more food production from Washington, the USDA wants to obtain farmer reaction and criticism of the numerous programs and policies operated by the Department of Agriculture. The farmers will be given the opportunity to discuss each of the agencies located in the county, following a brief explanation of the program by a representative of each agency.

Presiding over the meeting will be Fred Lewis of Centerville. Others who will participate in the

NEWARK P.T.A. PRESIDENT NAMES TWO CHAIRMEN

Mrs. Norma Wilburn, president of the Newark Elementary School P.T.A., named two chairmen to serve during the coming year at a meeting of the executive board held at her home last week.

Named to serve were Mrs. Lillian Lloyd, general chairman, and Mrs. Paul W. Cottingham, hospitality.

The regular year's activities of the P.T.A. will get underway on September 25 with a meeting of the board at the school. The first regular session for all members will be held October 2.

A cubic foot of lithium weighs only 33.5 pounds.

STATE FAIR OPENED YESTERDAY; RECORD CROWDS EXPECTED

Packed with stellar attractions and teeming with eye-filling exhibits, the 92nd California State Fair opened in Sacramento yesterday for a run of eleven eventful days.

Crowds streamed into the great Counties Building, filled to overflowing with the displays of 38 counties, nine foreign nations, the California Wine Cellar and the Foreign Trade Zone of the Port of San Francisco.

Others made their way to the wide-expanse of barns where thousands of head of livestock await judging; or to the great Art Show, the gorgeous Flower Show, the score or more exhibits in the Educational Area, the elaborate Armed Services exhibit, the comprehensive farm machinery exhibit and countless others, including the Junior Museum.

The great exhibit of the Pacific Telephone and Telegraph Company in Governor's Hall was the magnet for many others. And the atomic energy exhibit sponsored by the State Office of Civil Defense will draw large crowds.

Afternoon crowds enjoyed a program of thrilling horse races, free vaudeville shows, band concerts, puppet shows and many other free attractions.

In the evening, the big Night Show starring Jerry Colonna, the dazzling Pageant of California Fashions and the spectacular fireworks enthralled visitors.

A great thrill for youngsters will be provided on September 4 when their idol, Hopalong Cassidy, makes an appearance in a new unit of the Night Show featuring The Sons of the Pioneers.

The Shell building in San Francisco contains 29 stories and is 380 feet high.

Abrasive uses of diatomite are mainly confined to metal polishes and dental powders.

The University of Washington, with a 582 acre campus, is within the city limits of Seattle.

TOWNSHIP REGISTER

"What happens when Standard men go into the armed forces?"

One question on many people's minds these days is how military service may affect themselves or people they know... their jobs, their family security. People ask us, of course, about what happens to employees of Standard Oil Company of California.

The answer shows what a big company can do. Standard Oilers come through this trying period in better financial shape than you might expect:

Let's take for example Bill, an average young Standard Oilier. He makes \$368 a month. He has Company-paid life insurance worth \$4,420, a pension plan paid partly by himself, other benefits.

Suppose Bill is called into the armed forces. One problem a man faces then is lower income. But because Bill qualifies as to dependents and length of service, he'll be helped by a Standard Plan.

When Bill leaves, he gets an extra month's pay. Then, Standard sends his family a monthly check to make up the difference between his GI and Company pay—up to one-half his regular salary.

Moreover, Bill's Company life insurance remains in force. And the pension plan, which Bill paid for in part while he was working, continues to grow—but now Standard of California pays it all.

When Bill comes back, his job is waiting, his benefits are intact. Standard, having big economic resources can act to preserve the human resources of the nation... people like Bill and his family.

This is Standard's "G.I. Policy" for qualified employees called into the Armed Forces. We believe it helps to strengthen Company morale, and that of the whole nation as well.

I'd Like to Know... Many people write to Standard asking pertinent questions about the Company. We answer all letters individually, but some points seem of general interest. We take this way of discussing them for everyone. If you have a question, we urge you to write in care of: "I'd Like to Know," 225 Bush Street, San Francisco 20, California.

The FARMERS CORNER

by Ralph H. Taylor
Executive Secretary Agricultural
Council of California

WHAT IS FAMILY-SIZE FARM? that to the question, what size is a family-size farm? The importance of the question lies in the

quality of citizenship replacements provided by the industrious and self-reliant type of farm youth who come from efficient-size family farm units, and upon their low-cost, volume production of food and fiber for the nation.

WIDE DISAGREEMENT

There seems to be no disagreement as to the desirability of maintaining such farms. But persons of different political or economic philosophies seem to be in wide disagreement as to what constitutes a family-size farm. Spokes-

men and writers in the federal agencies and particularly in many of the depression-born agencies of government clearly favor family farms of such small size that their operators must inevitably lean on government for aid of one kind or another.

Many outspoken critics of the free enterprise system have condemned what they call "large farmers" as enemies of the people and destroyers of the family-size farm, yet they have never clearly defined where the dividing line

lies between the two kinds of farms.

Conservative economists, farm leaders, and many others, too, have been for the preservation of the family-size farm but have recognized that efficient management and production require larger areas in single holdings than ever before.

SMALL FARMS INEFFICIENT

Now comes the U.S.D.A., producing census and other figures to show the inefficiency of the small family farm. The Department

points to the necessity for conservation of manpower as a compelling reason for enlarging the size of many farms from one end of the country to the other. It shows that the tremendous quantities of food and fiber required by the non-farm population should make the city dweller interested in encouraging more efficient farm production.

The Department says that "of the approximately 5.75 million farms in the U. S. in 1945, nearly one million were classified as

small-scale units having a value of farm production in 1944 of from \$500 to \$1200, and with little or no work off the farm by the operator. Workers on the small-scale farming units were only one-fourth as productive as workers of medium-sized commercial-family farms 'value of production—\$3,000 to \$7,999—in terms of gross production per worker.

"Approximately 1.5 million farms, with a value of production (Continued on page 6)

SCENE IN CENTERVILLE

By IRENE MENDONCA

Irene Mendonca

VACATION IN MOUNTAINS

Mr. and Mrs. Karl Nordvik and sons of Oak Street, spent a week's vacation at De Sable, a P. G. & E. resort in the mountains near Chico. The rest of the party included Mr. and Mrs. Harry Weber, Mr. and Mrs. Walter Steinmetz and Mr. and Mrs. James Logan and Jeff. The group had a wonderful time

boating, swimming and fishing. The men spent two days trout fishing and caught enough for a wonderful dinner for the whole party.

MOVE TO TRACY

Mr. and Mrs. M. W. Lewis of Thornton Avenue were hosts at a barbecue given in honor of Mr. and Mrs. Joe Caldeira and son, Bob, last Sunday. The Caldeiras left Tuesday for Tracy where they will reside. New owners of the Caldeira residence on Thornton Avenue are Mr. and Mrs. Tony Medeiros and family of Alviso.

Also present at the barbecue were Mr. and Mrs. Jack Coley and family.

Mr. and Mrs. Anthony DeRosa and daughters, Jane and Rosalie, of Hollister, dropped in on Sunday evening for refreshments. The Caldeiras lived on Thornton Avenue for about three years and their friends and neighbors shall miss them very much.

HOUSEWARMING

A housewarming was given to Mr. and Mrs. Walter Hansen of Stevens Street last Saturday evening by Mr. and Mrs. Emilio Re. The Hansens moved into their new home two months ago. Those present were Mr. and Mrs. Larry Bettencourt of Newark, Mr. and Mrs. Ralph Campitelli of Castro Valley, Mr. and Mrs. Manuel Goularte, Mrs. Emily Reider and Miss Rose Santos of Newark, Mr. and Mrs. Chick Santos and Mr. and Mrs. Jack Kabach of Centerville, Mr. and Mrs. Kenneth Bratton of Alvarado, Mr. and Mrs. Jack Williams of Hayward, Mr. and Mrs. Bob Spurgeon of Newark, Mr. and Mrs. Ray Johnson of Oakland, Mrs. Dave Priego of San Lorenzo, Diane Reider and Frank Freese of Newark and Mr. Silvio Re of San Leandro. The evening was

spent at games and cards. Refreshments were served. The Hansens were presented with a lovely set of dinnerware.

RETURN FROM K. C. TOUR

Mr. and Mrs. Henry Machado of Centerville and Mr. and Mrs. Jessie Perry of Decoto returned this week from a Knights of Columbus tour across the United States. The sixteen day trip was made by train. Their travels took them to Washington, D. C., New York, Quebec, Montreal, across Canada to Banff and Lake Louise, Vancouver, down to Portland and then home. The trip was very interesting but they were most impressed with our nation's capitol. They enjoyed Quebec with its French language and customs also but the most beautiful spot of their travels was Banff and Lake Louise. The beauty there was simply breath-taking. The happy travelers enjoyed their trip immensely.

NEW CAR

We notice that Mrs. Rita Oliveira is driving around in a new car these days.

FAMILY BARBECUE

A family get-together and barbecue was given by Mr. and Mrs. Carl Fragus of Oak Street last Wednesday evening at their home. Those present were Mrs. Irma Kelly and Mr. and Mrs. Joe Kamerowski of Oakland, Mr. and Mrs. Pete Nunes, Mr. and Mrs. Jack Silva, Buddy and Joyce, and Mrs. Rita Oliveira of Centerville, and Mr. and Mrs. Vincent Oliveira of Hayward. The evening was spent at cards and a wonderful time was had by all.

TO HOLD POT-LUCK PICNIC

The K. of C. held installation of officers on Thursday, August 23, at the Parish Hall. Refreshments were served. A pot-luck picnic at Walt Connolly's summer place on Sunday, September 9, is next on the calendar of K. of C. members and their families.

SUNDAY VISITORS

Mr. and Mrs. Arthur Flores of San Jose and Mr. and Mrs. Al-

bert Brown of Mountain View visited your reporter and family last Sunday afternoon.

ST. JAMES SCHEDULE

Services September 2, fifteenth Sunday after Trinity: Holy Communion at 8 a.m., church school at 9:45 a.m., and morning prayer and sermon at 11. A nursery is provided at the rectory for the 11 o'clock service.

Tuesday, September 4, 7:30 p.m., Young Peoples Fellowship; Thursday, September 6, 6:30 p.m. annual corned beef and cabbage dinner of the Men's Club, 7:30 p.m., choir practice. (The choir will sing Sunday, September 9.); Friday, September 14, 6:30 p.m., parish dinner; Sunday, September 9, Holy Communion at 11 a.m. (ordinarily this service is held the first Sunday of the month).

CELEBRATES 70th YEAR

Mrs. Emily Amaral celebrated her 70th birthday last Saturday evening at her home. Those who gathered to help her celebrate were Mr. and Mrs. Tom Maloney and Mary, Mr. and Mrs. H. Yrus of Hayward, Mr. and Mrs. Edward Medeiros and daughter of Santa Clara, Florence Shearer and Evelyn Amaral of Redwood City, Mr. and Mrs. Wilbur Andrade and Paul, Mr. and Mrs. Wm. Andrade, Edwin and Richard, Miss Marian Jasper and the honoree's husband, Mr. Frank Amaral. A birthday cake and refreshments were served. The evening was spent at bingo and games. Mrs. Amaral was presented with many lovely gifts.

HOME FOR WEEK-END

Eldwin Andrade, son of Mr. and Mrs. Wm. Andrade, came home last week-end to visit his family. After 14 weeks in Camp Stoneman, he was transferred to Fort Ord where he is attending leadership school.

BACK TO COLLEGE

Harvey Hernandez will be guest of honor at a turkey dinner, given by his parents, Mr. and Mrs. Henry Hernandez, at their home on Stevens Street. The occasion will be

Harvey's birthday. Friends are expected to drop in throughout the day as it is also his last day at home for quite some time.

Harvey is majoring in physical education at Taylor University in Indiana and was called back to play football. He is leaving Monday for his destination.

HUNTING TRIP PLANNED

Harold Garcia, Buddy Campos and Wayne Day are planning a hunting trip to Hanford over the week-end. On their return home they will bring Mrs. E. Campos, who will stay for a month's vacation with her daughter, Mrs. Wayne Day of Mt. Vernon Avenue.

WEEK-END VISITORS

Mr. and Mrs. Laurence Houck and daughter of Ukiah spent last week-end with his sister and family, Mr. and Mrs. Al Martin and children of Blacow Road.

BRIGHTER OUTLOOK FOR RETIREMENT

Retirement age is no longer a time of lonely, static existence, but a period of productive, active living.

So says Dr. Norman P. Miller, assistant professor of physical education on the Los Angeles campus of the University of California.

"Retirement is now known for its creative living, community activity and participation, profitable avocation, hobbies and recreation in which idleness and boredom have no part," says Dr. Miller.

This condition is not automatic, though, he pointed out. It takes advance planning to find the right hide-away, the right hobby, good sources of income, and the right kind of group or club to join.

"Start the search for a place to settle down right now," he advocates. "Test the climates, learn the advantages and disadvantages, know the living costs, the people of those geographical areas that appeal to you."

"A good hobby, too, is important. Start right now to explore those that appeal to you. Good hobbies are: woodworking, photography, stamp collecting, dog raising, painting, church work, Red Cross work, youth work, lecturing, and poultry raising. The list is endless. "You don't retire 'from,' but 'to' something. Start planning now to prepare something to retire 'to,' then the happiness and fulfillment you seek can be yours."

The FARMERS CORNER

by RALPH H. TAYLOR

Executive Secretary
Agricultural Council
of California

(Continued from page 5)

of from \$1,200 to \$2,499, were classified as small commercial-family farms. Workers on these farms, on the average, were only 50 per cent as productive as workers on medium-sized commercial-family farms.

In spite of such evidence as this, there is still much pressure to have the government extend the number of these small, inefficient farms by government financing and encouragement.

It is time to scrutinize federal farm-size limitation programs and those that will put operators on uneconomic units if consumers want plentiful food supplies at reasonable prices, particularly during manpower shortages.

A family-size farm, therefore, must be large enough to utilize efficiently the farm machinery and the time and abilities of the operator and his workers, thus providing a fair return to them for their responsibilities, labor, and investment.

FIRST FALL MEET OF LADIES GUILD

The first fall meeting of the Ladies Guild of the Niles Congregational Church will be the annual fall picnic-lunch to be held at the Ellsworth gardens on Wednesday, September 5.

Mrs. Glen Mohn is chairman of the organization.

LEGAL NOTICE

NOTICE TO BIDDERS

NOTICE IS HEREBY GIVEN that the Board of Trustees of Niles School District of Alameda County, California, hereby calls for sealed bids to be delivered to the Clerk of said Board at the office of the District Superintendent in the Niles School Building, Second and School Streets, Niles, California, until the 11th day of September, 1951, at 7:30 P.M., at which time and place said bids will be opened for leasing one (1) new seventy-one (71) passenger, transit type, elementary school bus, and for purchasing one (1) used school bus from said district;

Each bidder shall agree in his bid to grant to said school district the options to extend said lease and the option to purchase said bus as is more fully described in the specifications and proposal form on file with said Board of Trustees.

Each bidder for the leasing of the new school bus to said district shall agree in his bid to purchase and remove from said Niles School grounds hereinabove mentioned, that certain used school bus belonging to said district and more particularly described in the said specifications, and shall state in his bid for leasing the new school bus the amount of the purchase price of the used school bus being purchased from said district which shall be applied toward the rental of the new bus, provided, however, the Board of Trustees reserves the right to accept the lowest responsible bid for leasing a new school bus and to reject any and all bids for the purchase of said used school bus, if the bids received for the purchase of said used school bus are not satisfactory to said Board of Trustees, and provided further that the Board of Trustees reserves the right in addition to reject any and all bids for the leasing of said new school bus. If the Board of Trustees determines to accept one of the bids for the purchase of the used school bus, the contract awarded will be awarded to the bidder whose net bid for leasing the new school bus is the lowest after deducting the amount bid for the purchase of said used school bus and whose bid for selling the new bus to the district under the option to purchase the bus is also the lowest, provided said bidder is a responsible bidder and the new school bus which he offers to furnish complies with the specifications. All bidders must bid on leasing the new school bus and on purchasing the used school bus.

These bids shall be presented in accordance with the specifications therefor which are on file with said Board of Trustees at its office located as hereinabove mentioned.

All bids must be on proposals obtained from said office of the Board of Trustees and must be filed by the bidder and accompanied by a check certified without qualification by some responsible bank or banker and made payable to the Niles School District of Alameda County to be retained by said district as agreed and liquidated damages should the party or parties to whom the lease is awarded fail to enter into the lease after the award or to give the bond required for the faithful performance of the lease agreement. The amount of said check shall be for One Hundred Fifty Dollars (\$150.00).

By order of the Board of Trustees, August 16, 1951.

H. L. SCOTT
Clerk of the Board of Trustees of Niles School District of Alameda County, State of California. A24,31

IMMUNIZATION PLAN BACKED BY CIVIL DEFENSE LEADERS

Mass immunization against diseases prevalent during natural and war-caused disasters is advocated as a Civil Defense precaution by Maj. Gen. Walter M. Robinson, state director of Civil Defense.

"Local Civil Defense medical divisions in many areas of the state have instituted successful mass immunization programs," he said.

Deputy Director Orville R. Caldwell and John F. Rolfe, American Red Cross state relations representative, joined in General Robinson's recommendation.

ENCOURAGES COURSES
"Both nurses' aides and those who have taken Red Cross home nursing courses can make an immediate contribution to Civil Defense by encouraging family members, especially children, and neighbors to become immunized against those diseases for which there is protection," Caldwell declared.

Rolfe added, "Tetanus immunization should be particularly stressed as a protection in case of injury."

DAY BY DAY IN DECOTO

By GRACE CAMINADA

LODGE MEETS

The Giuseppe Mazzini Lodge of the Sons of Italy in America met last Friday evening at the Hansen Hall in Centerville, with Nick Fazio, president, presiding. Basket awards were given to Clifford Serpa of Hayward, Mrs. Kimball of Niles, Margaret Williams of Decoto and Barbara Reina of Centerville. Guest of the evening was Frank Ragone, grand trustee of San Jose. He explained the hospitalization and several amendments that were revised at the Sonoma convention in June. Also present at the meeting were Mr. and Mrs. Pasquale Meli and daughter of San Leandro. An anniversary celebration is planned for sometime in December. Refreshments were served at the close of the meeting.

ANNUAL OUTING

The annual outing of the Hayward Poultry Producers was held last Sunday at the Linda Vista Park at Mission San Jose. Among those present were Mr. and Mrs. L. Ghigo of Niles, Mr. and Mrs. Earl Taber of Niles, Mr. and Mrs. F. Fantuzzi of Niles, Mr. and Mrs.

C. Maggiora of Mission San Jose, Mr. and Mrs. Orecchi of Centerville, Mr. and Mrs. J. Russolo of Newark.

NOW THEY KNOW!

It really makes my buttons pop to see the expression on people's faces when I admit that I am the Grace Caminada that writes for The Register. Lately I came across many who were so anxious to know who it was writing the Decoto column. Well, now they know and are they sorry, I bet!

AT ELKO

Mr. and Mrs. S. Dias and daughter, Adrienne, returned recently after spending several days at Elko, Nevada, where they did some trout fishing and had a nice rest. They were fortunate enough to motor near the Bing Crosby ranch but had missed the famous crooner by just a day or so as Bing had returned to Hollywood. However, they talked with some of the cowhands there and were they thrilled. Mr. and Mrs. D. Dias of Alvarado also went along on the vacation.

'HELLO' TO OLD FRIENDS

Mary Janeiro was pleasantly surprised one day last week when Mr. and Mrs. Larry Clark went into the post office and paid her a short visit. The Clarks formerly lived at 511 Eleventh Street. Larry is a principal at one of the schools in Mendocino County. They are now proud parents of three girls and three boys. Both Larry and Marjorie regretted they had

to rush off but asked Mary to say hello to all their friends for them. Well, here's their "hello."

FACE LIFTING

Both Mr. Ferrario and Joe have been retouching their home with a coat of paint after the house was remodeled. Certainly looks nice.

VISIT TO THE ISLANDS

Helen Falletti and her friend, Ame Erickson, sailed on August 4 on the Lurline for the Hawaiian Islands. A cocktail party was given by the girls aboard ship for their friends and family.

The boat left at 10 p.m. after four hours of goodbyes, etc. Before the ship docked at the island it was met by many smaller boats and hundreds of natives came aboard and flowered the passengers with gorgeous leis of many varieties of flowers grown on the island.

Helen and Ame joined the Alameda Chamber of Commerce in Honolulu for sightseeing tours. They toured the island of Oahu, visited the Dole pineapple fields, sugar fields, toured Pearl Harbor, lunched at the Officers Club (they were guests of Admiral Pillsbury), and they had an audience with the governor at his office in the palace in Honolulu.

They flew to the island of Hawaii and had a complete escorted tour of the island and visited coffee plantations, stood on the volcano that erupted last year and, much to their surprise, found the ground still warm where the lava had flown.

The girls stayed at the famous Kona Inn. They were entertained in the evenings by the Hawaiian dancers and singers. They at-

tended dinner parties at the Royal Hawaiian Hotel. They were shown how to eat with chopsticks and followed the Japanese customs when eating at the Ishii Gardens. They visited the famous Don the Beachcombers. After a breathless and exciting vacation, they flew home on the United States Strato cruiser on August 23 in the evening and arrived home in San Francisco early the next morning. The girls will long remember their wonderful trip and the wonderful Hawaiian Islands.

AT LAKE TAHOE

Mr. and Mrs. Frank Margarido and boys, Frankie and Freddie, spent a wonderful week at Lake Tahoe. Betty claims she just relaxed and had no worry of meal planning for one week at least. Just the life of Riley, how nice.

BIRTHDAY FETED

Belated birthday wishes to Bobbie Mederos who celebrated his birthday with several friends and his family on Tuesday, Aug. 21.

BAD ACCIDENT

Joey and Wayne Gonzales are enjoying their vacation at Grandma's before they return to school early next month. Joe and Elsie brought the boys up to the valley last week but on the way home while grabbing a bit to eat, a truck completely demolished their car. Both were fortunate not to be in the car when the accident happened but it's too bad about that nice car. I can see why both lost their appetite after all that.

VACATION AT HOME

Phyllis Fields is enjoying a two weeks' vacation at home. She hasn't been doing too much but the change seems to be agreeing with her.

RECUOPERATING

Of course I recently learned of this freak accident but, as the saying goes, "Better late than never." On August 10 Mrs. J. J. Cordeiro fell while she was outdoors and broke her shoulder. She has been recuperating slowly but it's a slow and painful procedure. Surely hope you will be better soon.

BOYS AT CAMP

Lester Mederos, scoutmaster of the Decoto Boy Scouts, chaperoned six boys to Felton where they spent the week-end. The boys stayed in the cabin belonging to Leon Mendonca of Hayward. They enjoyed outdoor meals and sleeping in sleeping bags. The boys also caught crawfish and went swimming in the creek. They also spent a day at Santa Cruz and, of course, rode all the fun-thrilling rides. The boys were Donnie Hidalgo, Bobbie Joseph and Paul Martin, Robert Gutierrez, Manuel Cordoza. Bernie Joseph also spent one day there with the fellows and on Sunday Eddie Paniagua and family motored to Felton.

29th ANNIVERSARY

Celebrating twenty-nine years of a happy marriage this week were Sally and Manuel Muniz. Both claim the years don't seem that many. I wonder if it's because they all have been happy years. I certainly wish you many, many more years together.

AL MARTINEZ HURT

Al Martinez of Niles suffered a broken leg last Saturday afternoon while working at the Berchem Meat Company plant near Newark. He was taken to San Jose Hospital.

PUBLIC IS INVITED TO BIG BARBECUE

Steaks, chicken, Italian spaghetti, garlic French bread, salad, beer, coffee, and homemade cake. Can you think of any more appetizing menu than that?

The ladies of the Corpus Christi Church of Niles are not only asking you to think about it, but they are making it possible for you to be present at this barbecue feast, the proceeds from which will go to the building fund for the church.

The date is Wednesday, September 12; the place of the barbecue is the patio at the Fred Dias home on Fremont Avenue; and the time is from six to nine o'clock. Reservations may be made either with Mrs. Dias or with Mrs. Robert Vieux. The chicken dinner is \$2.50; the steak dinner \$3.00.

TRUSTEES TO MEET

HINTS FOR HOMEMAKERS

SURPRISE SUMMER DINNER GUESTS WITH COLORFUL FROZEN LIME PIE

by the General Electric Consumers Institute

There's no color quite as cool as green—and no dessert more popular than pie, which makes frozen lime pie a "natural" as the dessert choice for your next hot weather dinner party.

It has a refreshing flavor and is the colorful climax to a summer meal. Here's the General Electric Consumers Institute recipe:

Frozen Lime Pie

1 1/4 cups fine graham cracker crumbs
2 tablespoons sugar
1/2 cup melted butter or margarine
2 eggs
1/2 cup sugar

1/2 cup light corn syrup
1/2 cup fresh lime juice
2 cups light cream
2 cups food coloring
1 envelope unflavored gelatin (1 tablespoon)
1/4 cup water

Mix graham cracker crumbs and sugar. Add butter; blend thoroughly. Press mixture evenly and firmly on bottom and side of 9-inch pie plate. Beat eggs until thick and lemon colored; gradually add sugar and corn syrup, beating constantly. Add lime juice and cream; blend. Add food coloring to tint delicate green. Soften gelatin in water 5 minutes in saucepan. Heat on low heat, stirring until gelatin is dissolved; remove from unit. Add egg mixture and blend. Pour into 1 or 2 ice trays and place in refrigerator on refrigerated shelf of freezing compartment. Set temperature control at coldest point; freeze until firm. Place frozen mixture in chilled bowl; beat smooth. Pour into graham cracker pie shell. Place on refrigerated shelf of freezing compartment; freeze until firm. Makes one 9-inch pie.

Press graham cracker crust mixture evenly and firmly on bottom and side of a pie plate.

Pour lime pie filling into one or two ice trays and place in refrigerator — on refrigerated shelf of freezing compartment — to freeze until firm. Be sure the temperature control is set at the coldest point.

After the frozen pie filling has been beaten smooth, poured into the graham cracker pie shell and returned to the refrigerated shelf of the freezing compartment to freeze until firm, here is the result—a cool and delicious party dessert.

SPORTS

BEARCATS DUMP BERKELEY NINE

By TONY ROGERS

The Centerville Bearcats traveled to Berkeley last Sunday and scored a 4 to 3 victory over the San Pablo Park nine on the San Pablo diamond.

Harvey Hernandez went the full nine innings for the locals, allowing but four hits, collecting nine strikeouts and giving up three walks.

Of the three runs scored by the San Pablo club, two were unearned, as the Cat infield was guilty of five errors.

The Bearcats broke into the scoring column in the third inning when Lemos doubled in Soito and Hernandez. In the fourth frame Len Smith's single scored Dutra and Faria.

San Pablo scored once in the fourth and sixth, each at the charity of the Bearcat infield. The last San Pablo run crossed the plate in the ninth inning when Ison lead off with a double, went to third on an infield out and scored after Bud Marshall made a diving, somersaulting catch of a drive to center field.

Joe Dutra led his club at the plate with two hits for four trips. Lemos' double was the only extra-base hit of the game.

The Bearcats will be idle this Sunday as some of the players will be on vacation.

The box score:

BEARCATS

GRIDSTERS TOLD TO BRING GEAR FIRST SCHOOL DAY

High school athletes who intend to come out for football this fall should report with their football shoes and gym clothes the opening day of school, it was announced this week by Jud Taylor, grid coach.

Taylor said the workouts would begin immediately this season because of early date of the first game.

FETE PLANNED FOR SOFTBALL TEAMS

Players and sponsors of the seven softball teams which competed in the past season's play of the Washington Township Softball Association will be the guests of the Association Board of Commissioners at a barbecue to be held September 6.

The affair will be staged at the grounds of the Washington Township Sportsmen's Club near Irvington with Joe Jason, John Calcano and Marceline Rogers serving as chefs.

Special guests at the barbecue will be the members of the Board of Trustees of Washington Union High School.

During the evening the first-place trophy will be presented to the Kleine Club, which went through the regular season undefeated, and the Y.M.I. team will be awarded the post-season playoff trophy.

J. R. Nunes, association president, said yesterday that the barbecue was financed for the most part from funds raised at the benefit game held last week.

"The members of the Association wish to express our thanks to the sport fans who helped support the league this year through their attendance at the games," Nunes said.

Other members of the Association commission are Vernon Rose, Ray Bettencourt, Arthur Belshaw and Frank Mayer.

NEW FISH, GAME SEASON OPENS

California clam diggers and shot-gun owners may hear the call of the outdoors September 1, when, according to the Division of Fish and Game, seasons open for the taking of clams, cockles, doves, sage hens, and brush, cottontail and jack rabbits in prescribed areas.

The annual dove hunting season, recently announced by the U. S. Fish and Wildlife Service, extends from September 1 to September 30. Bag limit is 10 birds per day.

In all counties north of San Luis Obispo County, the four-month restriction against taking of cockles comes to an end the first of the month. A bag limit of 50, and size limit of 1 1/2 inches will apply.

Humboldt and Monterey bay areas will be opened to the taking of all species of clams. There is no closed season elsewhere.

E. E. ENOS WILL ATTEND PRESIDENTIAL LUNCHEON

Edward E. Enos, Niles postmaster, will be among the guests at the luncheon to be given at the Fairmont Hotel on Tuesday for President Harry Truman.

The luncheon is to be given by the Democratic National Committee. Enos, president of the California Postmasters Association, will represent that group at the luncheon.

SWISS COAST TITLE BOUTS HERE SUNDAY

The twenty-first annual Pacific Coast Championship Swingfest, Swiss wrestling, will be staged Sunday at the Swiss Park near Newark.

Twenty-four matches, pitting the outstanding Swiss wrestlers of the west coast, will be staged during the day with the first match scheduled for 10 a.m.

Martin Grater of Milpitas, president of the local Swiss Lodge, will be general chairman for the day.

Dancing will be held both during the afternoon and evening to the music of Joe Reithmuth and his orchestra.

ADDITIONAL HOUSING AVAILABLE AT U.C.

Three additional residents halls will be opened for men students this fall on the Berkeley campus of the University of California, Mrs. Ruth Donnelly, University housing supervisor, announced this week.

The three halls, Cheney, Cunningham and Freeborn, will accommodate a total of 200 men students. They are part of a group of seven resident halls located at Hillside and Dwight Way. The remaining four halls will be operated for women students.

Mrs. Donnelly said that the cost per semester at each of the three men's halls will be \$323. This fee will include three meals daily. She added that applications for the fall semester should be made by writing or calling in person at the Housing Office, Building Q, University of California, Berkeley 4.

Trade at Home!

WASHINGTON TOWNSHIP IS YOUR SHOPPING CENTER

WHEN YOUR DOLLAR IS RUNG UP ON THE CASH REGISTER OF A LOCAL MERCHANT, IT STARTS ROLLING BACK INTO THE TRADE CHANNELS OF LOCAL ENTERPRISE

You spend a dollar with a merchant and that merchant has to pay about 20 cents of it for his clerk, managers, etc. He spends about 70 cents replacing the merchandise you bought and a nickle on rent, utilities and upkeep. That leaves him with a nickle. A nickle out of every dollar he takes in is his, and—you guessed it—he turns around and spends that in a local store for groceries, clothes, etc.

That's just the cycle that explains why we have a WASHINGTON TOWNSHIP. The more of those dollars you spend here the bigger and better the township becomes.

Betrothal Told Saturday Night

Wedding bells are in the offing for Bernie Leal, son of Mr. Joe Leal of Niles, and Marlene Ivaldi, daughter of Mr. and Mrs. Andrew Ivaldi of Oakland and granddaughter of Mr. and Mrs. A. Ivaldi of Irvington.

The announcement of the couple's engagement was made last Saturday night. A graduate of Washington High, he is now engaged in farming. His fiancée is still attending high school at Castlemont High and will be graduated in January.

Wedding plans are indefinite, but June has temporarily been set as the wedding month.

Two Birthdays Are Celebrated

Mrs. Maren Flindt of Niles celebrated her 74th birthday last Wednesday, August 22, by having a few of her friends in for the afternoon. That evening she was presented with an orchid corsage by her son, Louis Flindt, and taken out to dinner at Bancho's, in the company of Mr. and Mrs. Louis Flindt and family and her daughter, Mrs. Frank Brown and family of Boulder City, Nevada. They all came back home and were joined by another son and his wife, Mr. and Mrs. Vincent Flindt of Machados Corners and by Mrs. Jay King and sons. The evening closed with the serving of birthday cake—made by Mrs. Louis Flindt—and ice cream.

The next day Mrs. Flindt's grandson, David Brown, celebrated his fifteenth birthday at a family dinner party at the home of Mr. and Mrs. Louis Flindt.

To Graduate from Nursing School

Miss Joyce Harvey, daughter of Mr. and Mrs. George Harvey of Alvarado, will graduate from the San Jose Hospital School of Nursing tonight (Friday) at the San Jose Women's Club, San Jose. Joyce is a graduate of the Washington Union High School, class of '48. A reception will follow the graduation.

Surprise Party

Mrs. George Bonde was the honoree at a barbecue party last Monday night at the Ellsworth home. The party, which was a complete surprise to her, was arranged by her husband in honor of her birthday.

Those who enjoyed the delicious chicken barbecue included Mr. and Mrs. George Bonde Jr. and son, Peter; Mrs. Bonde's sister, Miss Addie Jorgensen; Mr. and Mrs. Robert Blacow, Mr. and Mrs. J. W. Boylin and sons, Gary and Bob, of San Bernardino; Mr. and Mrs. Marsten Dassel, Mrs. Georgianna Hoskins, Mrs. O. E. Walpert, Mrs. E. A. Ellsworth, Vernon Ellsworth, Mrs. Betty Brown, Mrs. Mildred Wilder, and Mrs. F. V. Jones.

Newarkites at Tahoe

Mr. and Mrs. Gene Barthe and family of Newark returned home Tuesday after a week spent in the Lake Tahoe area. According to Mrs. Barthe the weather man put on a good show for them, including everything—rain, hail, and thunderstorms. Most of the time the weather was pleasant, however, and they enjoyed themselves immensely.

SANTA CLARA COUNTY FAIR

Sailor Misses Ill-Fated Plane

Mrs. Peggy Cozzi, owner of the variety store in Niles, put in several very bad hours last Friday, as she was expecting her son, Ronald, to fly in from the east coast, and, for most of the day, wasn't certain that he hadn't taken the ill-fated plane that crashed in Decoto that day.

He came in on the same kind of plane on the same day, but about seven hours later, so arrived safely. He is on leave from his base at Newfoundland. He will have to return there on the thirteenth and complete an 18 months' assignment in that far-off country. He has been there for over a year.

Niles Family Home From West Indies

Dr. and Mrs. Gene Grau and daughter, Betty, returned home to Niles yesterday from a 17-day plane trip to the West Indies. They experienced everything in the way of weather, including hurricanes and temperatures of 126 degrees. They visited the islands of Jamaica, St. Thomas, Haiti, and Puerto Rico. They found Haiti especially interesting and want to return there some day, in spite of the heat.

Luncheon Honorees

Mrs. E. M. Grimmer Jr. was hostess at a luncheon Monday, which combined a baby shower for Mrs. Clyde Voorhees with a "welcome home again" party for Mrs. Jack Rathbone, who has been visiting her parents, Mr. and Mrs. Leon Solon. Those present were: Mmes. Henry Enos, Karl Nordvik, Arthur Belshaw, Edgar Van Scoy, Vernon Brown, William Katzer, Lester Mann, Joe Rose, and Miss Harriet Dias.

Return from Vacation

Mr. and Mrs. Hugh Henry of Irvington have returned home after a very pleasant five-day vacation near the Novarro River in Northern California.

Their son, Rowan, also was on vacation last week. He spent the time at Hoberg's, in Lake County.

In the Navy Now

Friends in Irvington of Arthur Hughes, former resident there, have received word that he is now taking recruit training at the Navy base in San Diego. He has been there about a week.

On Vacation

Mr. and Mrs. Manuel Bernardo of Centerville are at Richardson Mineral Springs enjoying a two weeks' rest.

Mrs. Bradford Returns From Trip to Iowa

Mrs. Anna Bradford, who has been traveling in the middle west for the past three weeks, returned home Monday after a most interesting trip. She was accompanied by her sister and brother-in-law, Mr. and Mrs. Ed Krumland of Byron and by the Krumlands' son and his wife, Mr. and Mrs. Roy Krumland.

They visited relatives in Iowa and Kansas, and took in some of the scenic spots along the way, including the Royal Gorge. They also visited friends in Salt Lake City.

Mrs. Bradford, who recently sold her home and the Bradford Court Apartments to Mr. and Mrs. Manuel Feruel, formerly of Oakland, has bought the former Shipman home on First Street, Niles, and plans to move in there soon.

At Going-Away Party

Mrs. Bertha Rose of Irvington attended a going-away party Monday at the home of Mrs. Edith Pierce in San Jose. Two of Mrs. Rose's fellow employees at Dohrmann's in San Jose were departing on a trip. Present were all of the other employees of the store.

Luncheon Guests

Mrs. Frank George of Nursery Road, Niles, was hostess at a luncheon recently which was attended by the following guests: Mrs. Ray Weldon of Oakland, Mrs. Laura Bryant of Oakland, Mrs. Melvin Oliver of San Leandro, Mrs. Edward Rose of San Leandro, and Mrs. Clayton George of Niles.

Return from South

Mr. and Mrs. John Kellerman of Newark have returned home after a two weeks' vacation in the south. They visited friends in Los Angeles and San Diego, then went over the border into Tia Juana. One of the highlights of their trip was a visit to the famous Knott's Berry Farm, where they had lunch.

From Oklahoma City

Visitors at the V. M. Cramer home in Irvington last week were Mr. Cramer's brother and wife, Mr. and Mrs. K. Cramer, and their son, from Oklahoma City. They left Sunday.

After 20 years

Mrs. E. J. Broome of Vancouver, British Columbia, was a guest at the home of her cousin, Mrs. Warren Gravestock, last week. The two cousins had not seen each other for 20 years.

Home on Emergency Call

It was bad news that brought Don Hibner home from his Navy base at Coronado last Wednesday. Word was sent him that his mother, Mrs. Henry Hibner, is very ill, having been stricken Tuesday. Don will be home for six days.

A BARGAIN

A certain seventeen-year-old I know got down to bedrock the other day, deciding, apparently, that his campaign should be drawn to a close.

He came right out with it. "Dad, can I buy a car?"

A significant pause was followed with, "Ask your mother."

The message was relayed to his mother this way, "Dad says I can have a car if you say it's okay."

So now we have a car. I say "we" advisedly. It has already become part of the family.

"Come out and see how she runs," was the excited invitation I had. "I got a bargain. The man's wife owned the car and she was going to have a baby, so he had to get rid of the car."

At first I didn't see the connection. Later, however, it occurred to me that a man could not possibly support this car AND a baby.

I was game. I climbed right into the car, taking careful note of the unusual accordion-pleat effect of its fenders, the novel way the headlights were sunken into the body, the artistic curves on the front and rear bumpers.

"It's — it's different, isn't it?" I finally got out, trying to show some enthusiasm.

"Now watch how she takes off!" Ten minutes later, after a violent pulling and tugging on various things that can be pulled and tugged on—and with an audience of sixteen neighborhood kids—we chugged off. It was like Fulton launching the steamboat or something. It was an occasion. There was great yelling and cries of "There she goes."

I settled uncomfortably back on the spot between the two big humps in the seat, and remarked, still trying to be appreciative, "The windows are nice and clean, aren't they? You can see out good."

"Gosh, mom," he said, with a hurt tone in his voice. "There aren't any windows. You can't have everything. I got a bargain."

Then I began to choke as blue fog swirled around me. "I think maybe we're on fire," I said, trying to keep the hysteria out of my voice.

"Don't worry," he consoled. "It's the exhaust. It isn't working."

Then I heard knocks. At first I thought it was the blood pounding in my ears, but he said, "It's the engine. Something's the matter." Then he went on to explain about the valves needing grinding, the cams missing, the carburetor's rusty condition, and the block's needing reboring.

"How are the tires?" I asked, gripping on to what was left of a

handle as we swung around a curve.

"One of 'em is in pretty good condition, and say!"—he added jubilantly, "it's got a swell radio and heater."

"You mean they work?" I asked in disbelief.

"Yeah, look!" he said proudly.

So we stopped the car and sat there and listened to the radio and turned the heater on. It was a hot day, so it wasn't too comfortable with the heater on, but the music was nice, and so I sat there and listened—and sweated—while he got out to try to find out why the gas and oil were pouring out into the street.

"I have a wonderful idea," I said, when he came out from under the car. "Why don't we just take out the radio and heater and—er—dispose of the—er—body in some way?" Somehow I felt like a convincing murderer.

But the idea did not meet with favor.

At the present time the car is dissembled. Parts of it are strung out all over Jones Way. We are receiving advice from specialists all over the area. We are buying tools. We are buying parts. We are buying clothes, because everything gets so full of grease they can't be washed.

We are also eating all of our meals in restaurants. You see, the refrigerator is full of parts. Some one was kind enough to tell us that the cylinder inserts should be cooled before they are put in.

So out went the butter, eggs, milk, meat and vegetables. And I don't have to cook any more.

I get kind of tired eating out all the time, but then, you have to give up something, when you get a bargain like that car.

CARD OF THANKS

We wish to express our deep gratitude to those who were so kind in extending their sympathy at the time of our recent bereavement.

Mrs. Gayle Stepp
Mrs. Grace Stepp
Mr. and Mrs. G. D. Maphet
Mr. and Mrs. Harvey Kohler

OUR 'NEWS SERVICE' BEATS THEM ALL

The staff of The Register has decided that it needs no Associated Press or United Press or International News Service. The Register has a service that beats them all — its very own readers!

Last week, at the time of the airplane crash, scores of phone calls came in, reporting the news of the disaster. For this spontaneous show of interest. The Register is truly grateful. These early reports to us from our readers made it possible for us to get to the scene of the crash at a very early hour.

Let us say "thanks" to all of our amateur reporters. You did a good job. We hope that we can always depend on you for such prompt "service."

RADIOS INSTALLED IN COUNTY TRUCKS

Two-way radio systems have been installed in five of the road maintenance trucks operated by the County Corporation Yard here and in the main office. The installation was made at the recommendation of County Surveyor Wallace Boggs.

The system provides two-way conversation with the sheriff's department and with the corporation yards at Hayward and Livermore.

The equipment was scheduled for a test last Friday. However, instead of the scheduled test it was put to good advantage as the trucks were utilized in the rescue work at the scene of the airliner crash near Decoto.

San Francisco's Nob Hill received its name from the "Nabobs," nickname of the Comstock millionaires who once lived there.

San Francisco is the only city in the United States which includes an item in its tax rate for support of its symphony orchestra.

Have you read the Want Ads?

To Clear Lake

Mr. and Mrs. E. D. Meeker and family will motor up to Clear Lake for over the Labor Day week-end. They will be accompanied by friends from Pleasanton.

Return to Santa Barbara

Dr. and Mrs. Jack Rathbone and their children, John and Mary Katherine, have returned home to Santa Barbara after a visit with her parents, Mr. and Mrs. Leon Solon. While Mrs. Rathbone and the two children were in Niles, Dr. Rathbone planned up to Seattle to take a week's course at the University of Washington.

GUESTS FROM SALT LAKE

House guests at the home of Mr. and Mrs. James Robertson of Newark this week were Mr. Robertson's cousins, Mr. and Mrs. Vaughn Morley of Salt Lake City.

THOROUGHFARE WILL BE OPENED IN CENTERVILLE

The opening of a second through street in Centerville, parallel with Main Street, was assured the Chamber of Commerce in a letter received this week from Chester E. Stanley, vice-chairman of the Board of Supervisors.

In a letter to Romeo Brunelli, chairman of the committee named by the Chamber to endeavor to get the county to open Stevens Street, Stanley stated that the Stevens Street project is not possible but that Joseph Street can be opened by the county.

"The Board of Supervisors has a definite policy whereby all streets built to the benefit of the adjacent properties must be paid for and built to county specifications by the property owners and then dedicated to the county for maintenance and repairs from then on out," Stanley stated.

S. P. OKAYS PLAN
"However, word just came in that the Southern Pacific Railroad Company will grant a 50-foot right-of-way for road purposes across their trackage to allow Joseph Street to be opened legally from Baine to Central Avenues.

"Joseph Street having the status of a county road at the present time can be improved at our expense by our forces, and we have made provisions to do this job, subject to the approval of the Southern Pacific Company's right to cross over their tracks.

"This improvement will be done in the very near future and will give Centerville another street paralleling the highway, or Main Street, even though it does offset by one block the end of Stevens Street at Baine.

"I hope when improved that Joseph Street and the presently improved Stevens Street will, to some extent, relieve the congested conditions that now exist on Main Street," Stanley concluded.

TRAFFIC CONTROL ASKED

Following a discussion of the hazards of the speeding traffic through the residential and business section on Highway 17, the Chamber members voted unanimously to make their prime objective the matter of safety on the highway through Centerville.

The secretary was instructed to write to the California Highway Patrol asking that they slow down truck traffic through the community "by any means possible."

It was also voted to construct signs at the entrance to the community warning drivers to slow down or face arrest.

Meetings have been suspended for the next two weeks because of the two Monday holidays.

Say you saw it in The Register.

Home Town News

"Dad says that Grade A Pasturized milk from the CLOVERDALE CREAMERY is the best in the township and I'll bet my pooch against your stick-horse that he's right."

HOME TOWN BOY MAKES GOOD; RETURNS

SUCCESSFUL BUILDER NOW LIVES IN NILES

A home town boy who made good sums up the career of Charles Russell, whose boyhood was spent in the township, and who has returned after many years to again live here, after having gained considerable fame as a building constructor. He and his wife this week moved into the home they just purchased from Mr. and Mrs. A. W. Gorman in Niles, which is known in this area as "the place with the lake."

Mr. Russell, who came to live in Irvington as a boy in 1911, and who was graduated from the Irvington school and the high school at Centerville, always remembered the township as the place where he would some day like to settle down.

His career, since his family left here in 1916 (his stepfather was J. E. Wamsley, station agent at Irvington for 32 years), has been a varied and colorful one—as well as a highly successful one.

"After leaving Irvington, I went to New York—my birthplace—and took a job as an auto mechanic with the Packard Company," said Mr. Russell. "I stayed there for two years, then came back to California and lived in East Oakland—where I lived until this week, when we moved to Niles."

During the years, he took up building, joined the FHA in 1935, when he became chief underwriter for northern California, passing on FHA loans from Fresno to the Oregon line, left the FHA in 1945 to return to the building business, and founded the Charles A. Russell Development Company, of which he is president, in 1946. He is also president of the C. A. Russell Investment Company, which owns and operates rentals and service stations, and of the Russell Products Company, which owns and operates seven Foster Freeze plants.

The Charles A. Russell Development Company, in the last five

years, has built 14 subdivisions in the Hayward-Castro Valley area, and completed 263 homes this past year.

"This area," stated Mr. Russell, referring to the township, "is the last undeveloped area between San Jose and Decoto and is the last frontier for home building."

So convinced is he of the bright future for the township that the Russell Development Company is transferring the major portions of its operations to the township this next spring, having already taken an option on 42 acres of land in Mission San Jose.

In recalling his boyhood days here, the builder mentioned the old Essany studios in Niles, which he remembers well. He and his wife, Edna, have six children, all grown, and sixteen grandchildren. They already have outlined rather extensive plans for continuing the beautification of the former Gorman home, which was built and owned originally by the Snells.

"This is the best climate in California," concluded Mr. Russell, "and I know that I and my wife are going to enjoy living here."

California

Week Ending Sept. 1, 1951

Potpourri of

Celebrations

California undoubtedly is the celebratngest state in the Union.

Every week in the year some community or county is tooting its horn and displaying its prize heifers, luscious fruits and pretty girls.

The editors of Magazine California get buried deeper than you can guess in pictures and publicity stories on celebrations.

In this issue we've tried to highlight three unique events, highlight three unique events, one in Lake County, another in Antelope Valley at Lancaster and the third at Pomona.

At right is pretty Jo Ann Scott and prize baby Berkshire hog she's grooming for entry at Pomona in L.A. County fair which, Los Angeles style, is world's biggest. See "Vacation Time" Page Four

IT COULD HIT YOUR FARM TONIGHT

Do you believe farms are safe from enemy attacks? There is a fine chance they would be the first targets.

By Richard Gerstell and Claude Gifford

—Condensed from Farm Journal

Suppose that some morning you go out to the barn and find one or two of your cows drooling at the mouth and looking strangely sick. You call the veterinarian, who takes one look and says, "Foot-and-mouth disease."

How could foot-and-mouth possibly get to your place? Agents of an enemy government may have brought them in. On that day biological war will have come to your farm! Biological warfare—some of the deadliest germ warfare, or times called germ warfare, or

Winter Vegetables Ready for Planting

Winter food crops need an early and warm start so should be planted now says the August issue of Sunset Magazine. Winter vegetables run mostly to root, leaf and cabbage family crops.

Broccoli, cauliflower, cabbage and Brussels sprouts can be grown from seed or from started plants. Celery and onions are best grown from seedlings; mustard and lettuce are usually grown from seed.

The basic idea in growing these crops is to start them in warm weather and let them mature in cold weather.

When in Oakland, hear Louis L. Sherman, M.D., at 1:30 p.m. as his guest. Medical Pictures for the layman are colored during class, explaining how to get rid of crippling poisons through all seven organs of elimination. It was not God's plan to get skin, lungs, blood, liver and lymphatics as mediums to eliminate poisons. Many have learned and have been helped.

"THE ROAD TO HEALTH"

If unable to attend lectures, read the "Road to Health," mailed for 25c. Louis L. Sherman, M.D., 2841 High St., Oakland 16, Calif. Thirty years experience translating system cleansing, fourteen years teaching "Road to Health" at national and international schools. Getting rid of your poisons before the poisons get rid of you.

Tips on Gardening

Gardening tips for the week... This is the time of the year when mums must be kept in active growth. Water them often and apply sufficient food to maintain their rapid growth. Lack of moisture causes hardening of the stems, a condition that leads to inferior blooms. If the plants have not been staked by now then do this job at once. Fuchsias are now in flower and may be seen at nursery yards. This is a good time to make selections as you can see

New Shrubs for High Value

Newly set-out shrubs require special attention the first year. These shrubs should have the soil cultivated at least two inches deep in a two-foot circle about each plant.

The cultivation will get rid of the weeds and grass which, if allowed to remain, will rob the soil of the moisture and plant nutrients necessary for the well-being of the plants.

Do not fertilize until late summer. To do so now may over-stimulate the plants. It is assumed that the soil is thoroughly prepared in advance of planting, thus providing sufficient food for the summer's growth.

Newly set-out shrubs and trees should be watered enough during July and August, to keep them growing.

When A Walnut Marries

Had a letter from up in Lake County a while back. Lost it. Hope the writer of that letter sees this. His question was: "How do I go about working English walnuts on to black walnut rootstock?"

The usual situation finds a vigorous black walnut that has grown to some size and the owner decides he might just as well be harvesting the more desirable type.

The time for this operation is just before growth starts in the spring. The most satisfactory method is known as cleft grafting. The trunk, if the tree is reasonably small, is sawed off and split through the center. The English walnut scions should be about 1/2 inch in diameter of firm wood from the previous season's growth, with at least two good buds.

Spread the split trunk open with a small wooden wedge, smooth the surfaces with a sharp knife. Taper the lower end of the scion to accurately fit the split in the rootstock. Between the bark and the wood of both scion and rootstock is the point at which the union takes place. Set your scions with these lines together. Loosen the wedges just enough to hold the scions firmly. Cover every cut, sawed or split area with a grafting compound and protect the entire job with a large manilla bag.

In a large tree use several small limbs rather than the main trunk—the most satisfactory size is about three or four inches.

(1) Make your scions fit. (2) The cambium layers where wood and bark meet, must match. (3) Protect with grafting compound and manilla bag. (4) Ask your farm adviser for an illustrated bulletin, or better still, watch an experienced grafter do his stuff!

Flower Needs Chaperone

Ye Garden Ed.

Writes on Sex

By ALFRED AMES
Garden Editor

Of all natural phenomena one of the most amazing is the wide variety of humans actively engaged in horticulture — particularly the men.

Particularly is the right word to use when it comes to the activities of the male gardener. He trims, ties and tags each specimen in a thoroughly systematic manner. Yet statistics show locally that he is incapable of reaching the corner grocery without the list his wife hopefully provides.

Had a visitor with a problem last Sunday morning. His glox-ioid won't open and he's scheduled to exhibit 'em at the county fair this week. He sort of figured as I recall, that the fertilizer he'd been using on 'em was too high in nitrogen. Could be.

Now this particular curator of a clay pot collection is a carpenter by trade and hoists a just with the best of them. See what we mean? After hours on week ends there is no telling when you'll find in the garden.

The Blossom that Needs a Man

Name

ter Used a Fort Teach Only Peace

By NICHOLS FIELD WILSON

radle of California's present greatness was Sutter's. Exactly Capt. John Augustus Sutter used his fort, which the arts of War, but those of Peace, is really an "Adventure in Business" that redound with and glory of the state.

Sutter lacked nothing but the title of being an emperor when he founded New Helvetia. The extent of his domain was measured in leagues, his word was law, his "subjects" docile and series of strange and magic anomalies. He was Helvetia as a war-washbuckling adventurer, committed to the Mexican other than the building of a fort.

Both Masson and Jackson are journalists of wide and varied experience. Where he was a staff member of McClain's, leading magazine of the Dominion. He recently crashed the American "big time" with a story in Saturday Evening Post.

Mike, who some "Nuggets" may give you some jolts as well as chuckles, has trafficked in both for a number of years. His past includes stretches at script writing for 20th Century-Fox and M.G.M. Studios, four years in the Navy, when he wrote and produced shows for the Armed Forces Radio Service, starring such celebrities as Frank Sinatra, Dick Haymes and Helen Forrest. He is also one-time press agent for Sally Rand, during her appearances at the World's Fair in San Francisco. He was once staff reviewer for Liberty Magazine.

Both Masson and Jackson now happen to reside in Laguna Beach.

Magazine California is also proud of its editorial staff who, by issue, have helped improve its quality and reader interest. These include Nichols Field Wilson, well-known California writer, who contributes "Adventures in Business," Alfred Ames, garden editor who gardens as well as writes spicy items about California fruits and vegetables; Helen Weil, fashion editor, who does a sparkling job of keeping the girls posted on the latest in styles; and Criswell, who boldly foretells the future for some 350,000 readers of Magazine California.

We are also indebted to a number of California newspaper editors and writers (some of them members of the Magazine Associate group) which publishes this magazine for special features on all phases of California life.

PAUL NEWELL

The National League of Professional Baseball Clubs was founded 74 years ago, February 2, 1876.

His vision and foresight—plus no small degree of humanitarian impulse—were proven in his early decision to enter milling.

He heard from the Indians their tragic tale of famine in lean years. Sutter knew that well-filled granaries would change all that.

Difficult Tasks

He knew somewhat of engineering. (Continued on Page 5)

Two Hefty Additions to Our Staff

With this issue, Magazine California is pleased to announce two hefty additions to its staff of writers and editors.

Hal Masson, who contributed "The Sea Raiders" to this issue and has written two previous feature articles for Magazine California, is joining our staff and will turn his energies and talents toward making this the brightest and most interesting periodical in the Golden State.

Also joining us in this prime objective is Mike Jackson, whose tantalizing "Nuggets" column is born with this issue.

Both Masson and Jackson are journalists of wide and varied experience.

Difficult Tasks

"Nuggets"

by Mike Jackson

HOME S. HOME. Do you own the house you live in? Chances are you've thrown out all the Spanish junk by now and are done up in Early American maple, California way ahead of rest of the states in homebuilding. Spent a whopping \$1,723,800,000 in 1948 for new homes. Incomplete 1950 reports said to be greater. In Southern California, 85 per cent of homes heavily mortgaged. Don't know how Northern California rates in this category. Southern and Northern California entirely different breeds. Southerners more gregarious. Northerners more homesitely friendly. More jackets in south. In case of State civil war, South would beat North. South has Frank Sinatra and Errol Flynn. Who has North got?

CALIFORNIANS. Ralph Kiner and Nancy Chaffee. The big league from Alhambra will marry the racket queen from Ventura this fall. Nancy says she will give up tennis when she becomes wife. Nancy will probably change her mind. Men have more character than women and when they make a decision they stick to it. . . . Cheyenne. Professional strip-teaser. Cheyenne used her art to save her honor. Every time fresh man made grab at Cheyenne, all he got was a look of disgust. When garb got down to strategic flimsies, Cheyenne dashed from auto. This attraction was so attractive that gathering San Jose crowd scared off loathario.

... Phil C. Orr, Lompoc. Orr now busily examining whale tooth found in local quarry. Don't know what a whale would be doing in a local quarry, or what that dialle is. Orr, expert in such matters, says tooth is 7,000 years old.

THE BERRIES. Like boysenberries? Then bow toward Napa valley. That's where Rudolph Boysen developed his berry back in 1923. Boysen spread a mixture of pollen from Logan and cutberry berries on blackberry flowers. Result: Boysenberry. Boysen didn't do much about exploiting his berry till Walter Knott got excited over it. 2nd result: Knott's Berry Farm. Boysen was long time superintendent in Anaheim.

HASH. L.A. psychologist, F. J. Leimer, says if people were to be reincarnated as animals men would choose to be horses. Women, cats. I heard rumors of man in Garberville who trained his cat to shake hands and play dead. Probably false rumor. Cats can't be trained to do anything. . . . Madam: If you were born out of state and have California born grown daughter, I will bet you subscription to this West.

MONEY. California income last year was \$18,542,000,000. If you own television set and flick it off now and then to go to movies, you have more than your share of state's wealth.

Grass Valley Airport, formerly Gilmore Field, is said to be the oldest commercial airport in the West.

low-salt contamination batteries, 6 high-sulfur contamination batteries, 6 low-sulfur contamination batteries, 6 high-nitrogen contamination batteries, 6 low-nitrogen contamination batteries, 6 high-oxygen contamination batteries, 6 low-oxygen contamination batteries, 6 high-carbon contamination batteries, 6 low-carbon contamination batteries, 6 high-hydrogen contamination batteries, 6 low-hydrogen contamination batteries, 6 high-helium contamination batteries, 6 low-helium contamination batteries, 6 high-neon contamination batteries, 6 low-neon contamination batteries, 6 high-argon contamination batteries, 6 low-argon contamination batteries, 6 high-krypton contamination batteries, 6 low-krypton contamination batteries, 6 high-xenon contamination batteries, 6 low-xenon contamination batteries, 6 high-rare earth contamination batteries, 6 low-rare earth contamination batteries, 6 high-transition metal contamination batteries, 6 low-transition metal contamination batteries, 6 high-main group contamination batteries, 6 low-main group contamination batteries, 6 high-lanthanide contamination batteries, 6 low-lanthanide contamination batteries, 6 high-actinide contamination batteries, 6 low-actinide contamination batteries, 6 high-synthetic contamination batteries, 6 low-synthetic contamination batteries, 6 high-natural contamination batteries, 6 low-natural contamination batteries, 6 high-artificial contamination batteries, 6 low-artificial contamination batteries, 6 high-mutant contamination batteries, 6 low-mutant contamination batteries, 6 high-cancerous contamination batteries, 6 low-cancerous contamination batteries, 6 high-toxic contamination batteries, 6 low-toxic contamination batteries, 6 high-radioactive contamination batteries, 6 low-radioactive contamination batteries, 6 high-flammable contamination batteries, 6 low-flammable contamination batteries, 6 high-explosive contamination batteries, 6 low-explosive contamination batteries, 6 high-corrosive contamination batteries, 6 low-corrosive contamination batteries, 6 high-oxidizing contamination batteries, 6 low-oxidizing contamination batteries, 6 high-reducing contamination batteries, 6 low-reducing contamination batteries, 6 high-acidic contamination batteries, 6 low-acidic contamination batteries, 6 high-alkaline contamination batteries, 6 low-alkaline contamination batteries, 6 high-salt contamination batteries, 6 low-salt contamination batteries, 6 high-sulfur contamination batteries, 6 low-sulfur contamination batteries, 6 high-nitrogen contamination batteries, 6 low-nitrogen contamination batteries, 6 high-oxygen contamination batteries, 6 low-oxygen contamination batteries, 6 high-carbon contamination batteries, 6 low-carbon contamination batteries, 6 high-hydrogen contamination batteries, 6 low-hydrogen contamination batteries, 6 high-helium contamination batteries, 6 low-helium contamination batteries, 6 high-neon contamination batteries, 6 low-neon contamination batteries, 6 high-argon contamination batteries, 6 low-argon contamination batteries, 6 high-krypton contamination batteries, 6 low-krypton contamination batteries, 6 high-xenon contamination batteries, 6 low-xenon contamination batteries, 6 high-rare earth contamination batteries, 6 low-rare earth contamination batteries, 6 high-transition metal contamination batteries, 6 low-transition metal contamination batteries, 6 high-main group contamination batteries, 6 low-main group contamination batteries, 6 high-lanthanide contamination batteries, 6 low-lanthanide contamination batteries, 6 high-actinide contamination batteries, 6 low-actinide contamination batteries, 6 high-synthetic contamination batteries, 6 low-synthetic contamination batteries, 6 high-natural contamination batteries, 6 low-natural contamination batteries, 6 high-artificial contamination batteries, 6 low-artificial contamination batteries, 6 high-mutant contamination batteries, 6 low-mutant contamination batteries, 6 high-cancerous contamination batteries, 6 low-cancerous contamination batteries, 6 high-toxic contamination batteries, 6 low-toxic contamination batteries, 6 high-radioactive contamination batteries, 6 low-radioactive contamination batteries, 6 high-flammable contamination batteries, 6 low-flammable contamination batteries, 6 high-explosive contamination batteries, 6 low-explosive contamination batteries, 6 high-corrosive contamination batteries, 6 low-corrosive contamination batteries, 6 high-oxidizing contamination batteries, 6 low-oxidizing contamination batteries, 6 high-reducing contamination batteries, 6 low-reducing contamination batteries, 6 high-acidic contamination batteries, 6 low-acidic contamination batteries, 6 high-alkaline contamination batteries, 6 low-alkaline contamination batteries, 6 high-salt contamination batteries, 6 low-salt contamination batteries, 6 high-sulfur contamination batteries, 6 low-sulfur contamination batteries, 6 high-nitrogen contamination batteries, 6 low-nitrogen contamination batteries, 6 high-oxygen contamination batteries, 6 low-oxygen contamination batteries, 6 high-carbon contamination batteries, 6 low-carbon contamination batteries, 6 high-hydrogen contamination batteries, 6 low-hydrogen contamination batteries, 6 high-helium contamination batteries, 6 low-helium contamination batteries, 6 high-neon contamination batteries, 6 low-neon contamination batteries, 6 high-argon contamination batteries, 6 low-argon contamination batteries, 6 high-krypton contamination batteries, 6 low-krypton contamination batteries, 6 high-xenon contamination batteries, 6 low-xenon contamination batteries, 6 high-rare earth contamination batteries, 6 low-rare earth contamination batteries, 6 high-transition metal contamination batteries, 6 low-transition metal contamination batteries, 6 high-main group contamination batteries, 6 low-main group contamination batteries, 6 high-lanthanide contamination batteries, 6 low-lanthanide contamination batteries, 6 high-actinide contamination batteries, 6 low-actinide contamination batteries, 6 high-synthetic contamination batteries, 6 low-synthetic contamination batteries, 6 high-natural contamination batteries, 6 low-natural contamination batteries, 6 high-artificial contamination batteries, 6 low-artificial contamination batteries, 6 high-mutant contamination batteries, 6 low-mutant contamination batteries, 6 high-cancerous contamination batteries, 6 low-cancerous contamination batteries, 6 high-toxic contamination batteries, 6 low-toxic contamination batteries, 6 high-radioactive contamination batteries, 6 low-radioactive contamination batteries, 6 high-flammable contamination batteries, 6 low-flammable contamination batteries, 6 high-explosive contamination batteries, 6 low-explosive contamination batteries, 6 high-corrosive contamination batteries, 6 low-corrosive contamination batteries, 6 high-oxidizing contamination batteries, 6 low-oxidizing contamination batteries, 6 high-reducing contamination batteries, 6 low-reducing contamination batteries, 6 high-acidic contamination batteries, 6 low-acidic contamination batteries, 6 high-alkaline contamination batteries, 6 low-alkaline contamination batteries, 6 high-salt contamination batteries, 6 low-salt contamination batteries, 6 high-sulfur contamination batteries, 6 low-sulfur contamination batteries, 6 high-nitrogen contamination batteries, 6 low-nitrogen contamination batteries, 6 high-oxygen contamination batteries, 6 low-oxygen contamination batteries, 6 high-carbon contamination batteries, 6 low-carbon contamination batteries, 6 high-hydrogen contamination batteries, 6 low-hydrogen contamination batteries, 6 high-helium contamination batteries, 6 low-helium contamination batteries, 6 high-neon contamination batteries, 6 low-neon contamination batteries, 6 high-argon contamination batteries, 6 low-argon contamination batteries, 6 high-krypton contamination batteries, 6 low-krypton contamination batteries, 6 high-xenon contamination batteries, 6 low-xenon contamination batteries, 6 high-rare earth contamination batteries, 6 low-rare earth contamination batteries, 6 high-transition metal contamination batteries, 6 low-transition metal contamination batteries, 6 high-main group contamination batteries, 6 low-main group contamination batteries, 6 high-lanthanide contamination batteries, 6 low-lanthanide contamination batteries, 6 high-actinide contamination batteries, 6 low-actinide contamination batteries, 6 high-synthetic contamination batteries, 6 low-synthetic contamination batteries, 6 high-natural contamination batteries, 6 low-natural contamination batteries, 6 high-artificial contamination batteries, 6 low-artificial contamination batteries, 6 high-mutant contamination batteries, 6 low-mutant contamination batteries, 6 high-cancerous contamination batteries, 6 low-cancerous contamination batteries, 6 high-toxic contamination batteries, 6 low-toxic contamination batteries, 6 high-radioactive contamination batteries, 6 low-radioactive contamination batteries, 6 high-flammable contamination batteries, 6 low-flammable contamination batteries, 6 high-explosive contamination batteries, 6 low-explosive contamination batteries, 6 high-corrosive contamination batteries, 6 low-corrosive contamination batteries, 6 high-oxidizing contamination batteries, 6 low-oxidizing contamination batteries, 6 high-reducing contamination batteries, 6 low-reducing contamination batteries, 6 high-acidic contamination batteries, 6 low-acidic contamination batteries, 6 high-alkaline contamination batteries, 6 low-alkaline contamination batteries, 6 high-salt contamination batteries, 6 low-salt contamination batteries, 6 high-sulfur contamination batteries, 6 low-sulfur contamination batteries, 6 high-nitrogen contamination batteries, 6 low-nitrogen contamination batteries, 6 high-oxygen contamination batteries, 6 low-oxygen contamination batteries, 6 high-carbon contamination batteries, 6 low-carbon contamination batteries, 6 high-hydrogen contamination batteries, 6 low-hydrogen contamination batteries, 6 high-helium contamination batteries, 6 low-helium contamination batteries, 6 high-neon contamination batteries, 6 low-neon contamination batteries, 6 high-argon contamination batteries, 6 low-argon contamination batteries, 6 high-krypton contamination batteries, 6 low-krypton contamination batteries, 6 high-xenon contamination batteries, 6 low-xenon contamination batteries, 6 high-rare earth contamination batteries, 6 low-rare earth contamination batteries, 6 high-transition metal contamination batteries, 6 low-transition metal contamination batteries, 6 high-main group contamination batteries, 6 low-main group contamination batteries, 6 high-lanthanide contamination batteries, 6 low-lanthanide contamination batteries, 6 high-actinide contamination batteries, 6 low-actinide contamination batteries, 6
